|                                                                                                                         | PAGE               |
|-------------------------------------------------------------------------------------------------------------------------|--------------------|
| Colouring of. (i, 1882).....                                                                                            | 366                |
| Comparison of Puzzolana, Portland and Roman. (Boehme.) (x, 1891).....                                                   | 140                |
| Composition for Fusible. (P) Mackay. (viii, 1889).....                                                                  | 50                 |
| Composition of, before and after Setting. (Hauenschild.) (i, 1882).....                                                 | 322                |
| Consumption of Native and Foreign, in Japan. (T.R.) (xii, 1893).....                                                    | 554                |
| Decomposition of, by Water. (Le Chatelier.) (iii, 1884).....                                                            | 485                |
| Effect of Water on: (Le Chatelier.) (De Perrodil.) (iv, 1885).....                                                      | 215                |
| (Schumann.) (i, 1882).....                                                                                              | 27                 |
| Enriching Materials for Prep. of. (P) Cajot. (x, 1891).....                                                             | 128                |
| Estimation of Alumina in. (Pronier.) (iv, 1885).....                                                                    | 215                |
| For Castings. (i, 1882).....                                                                                            | 27                 |
| For Leather Belting. (xiii, 1894).....                                                                                  | 164                |
| For Production of Artificial Stone, Manufacture of. (P) Weekwarth and Hoeft. (xiv, 1895).....                           | 577                |
| Hardening. (Levoir.) (v, 1886).....                                                                                     | 492                |
| Hydraulic. (ix, 1890).....                                                                                              | 69                 |
| (Busch.) (xi, 1892).....                                                                                                | 164                |
| (Le Chatelier.) (vii, 1888).....                                                                                        | 847                |
| Hydraulic Properties of. (Michel.) (v, 1886).....                                                                       | 602                |
| Hydraulic, Valuation of Marl for. (Lunge and Schochor-Tscherny.) (xiv, 1895).....                                       | 37                 |
| Influence of Sugar on. (Stammer.) (viii, 1889).....                                                                     | 545                |
| Influence of Temperature on Time of Setting of Hydraulic. (Tetmaier.) (xii, 1893).....                                  | 1036               |
| Investigation of Hydraulic. (Candiot.) (x, 1891).....                                                                   | 140                |
| Luminous and Damp-Proof. (P) Ormerod and Horne. (v, 1886).....                                                          | 327                |
| Magnesia. (ix, 1890).....                                                                                               | 736                |
| Manufacture of: (P) Gerhardt. (iv, 1885).....                                                                           | 119                |
| (P) Heys. (viii, 1889).....                                                                                             | 120                |
| (P) Kulewain. (xiv, 1895).....                                                                                          | 273                |
| (P) Reynolds and Brown. (xi, 1892).....                                                                                 | 165                |
| (P) Robbins. (iii, 1884).....                                                                                           | 445                |
| (P) Snelus and others. (vii, 1888).....                                                                                 | 631, 631, 631, 677 |
| (P) Thompson. From Bosse and Freise. (ii, 1883).....                                                                    | 478                |
| Manufacture of, by Treatment with Steam. (Prussing.) (xiv, 1895).....                                                   | 970                |
| Manuf. of Hydraulic. (P) Scott and others. (vii, 1888).....                                                             | 325                |
| Manufacture of Non-Efflorescent White. (P) Tomlinson. (xii, 1893).....                                                  | 835                |
| Manuf. of Refractory. (P) Lea and Lynam. (ix, 1890).....                                                                | 395                |
| Materials for Making. (P) Smith.....                                                                                    | (iii, 1884), 31;   |
| (v, 1886).....                                                                                                          | 671                |
| Natural. (Cluss.) (viii, 1889).....                                                                                     | 708                |
| Of the Isère, Manuf. and Properties of. (Gobin.) (viii, 1889).....                                                      | 887                |
| Or Plasters, Manufacture of. (P) Alison. (vi, 1887).....                                                                | 218                |
| Production of. (P) Ropes and Sellars. (xiii, 1894).....                                                                 | 639                |

| And Hydrochloric Acid, Manuf. of. (P) Weldon. (iv, 1885).....                                    | 498  |
| And HCl, Manufacture of, from Magnesium Chloride.<br>(Eschellmann.) (viii, 1889).....            | 190  |
| And Hydrogen from Hydrochloric Acid. (P) Kellner.<br>(xi, 1892).....                             | 239  |
| And Iodine, Separation of. (Jannasch and Aschhoff.)<br>(xi, 1892).....                           | 845  |
| And Lime, Interaction of. (Veley.) (xiii, 1894).....                                             | 250  |
| And Sodium Amalgam, Production of. (P) Greenwood.<br>(xii, 1893).....                            | 1042 |
| And Strong HCl, Production of. (P) Lyte and Steinhart.<br>(xi, 1892).....                        | 161  |
| And Sulphate of Lime, Production of. (P) Campbell and<br>Boyd. (ix, 1890).....                   | 508  |
| Apparatus for Electrolytically Producing:<br>(P) Lake. From Roberts. (xiv, 1895).....            | 42   |
| (P) Lake. From Union Chemical Co. (xiii, 1894).....                                              | 257  |
| App. for Expansion of, from Solution. (P) Bohm. (viii, 1889).....                                | 329  |
| Apparatus for Generation of. (Grunewald.) (x, 1891).....                                         | 795  |
| Apparatus for Liquefying, &c. (P) Johnson. From Marx<br>and Weller. (x, 1891).....               | 546  |
| Apparatus for Manufacture of:<br>(P) Bell. From Schloessing. (xi, 1892).....                     | 686  |
| (P) Brock and others. (xiv, 1895).....                                                           | 572  |
| (P) de Wilde and others. (xi, 1892), 907; (xii, 1893).....                                       | 926  |
| Apparatus for Production of:<br>(Brown.) (vi, 1887).....                                         | 248  |
| (Hamburger.) (vi, 1887).....                                                                     | 248  |
| Apparatus for Production of Liquid:<br>(P) Lake. From Cullen. (xi, 1892).....                    | 747  |
| (P) Wilcox. From "The Badische Anilin und Soda<br>Fabrik." (viii, 1889).....                     | 777  |
| Bleach from Dilute. (Weldon and Hewitt.) (iv, 1885).....                                         | 311  |
| Bleaching Filtrous Matter without. (P) Thomas. (i, 1882).....                                    | 406  |
| Bleaching, Inodorously. (P) Martin. (i, 1882).....                                               | 362  |
| Bromine and Iodine, Direct Separation of. (Jannasch and<br>Aschhoff.) (xi, 1892).....            | 845  |
| Cause of Occurrence of, in Oxygen. (Wagner.) (ii, 1883).....                                     | 124  |
| Commercial Production of, by Ammonia-Soda Process.<br>(Bale.) (xiii, 1894).....                  | 200  |
| Compounds for Bleaching. (P) Johnson. From Hermitte.<br>(vi, 1887).....                          | 290  |
| Compounds, Manuf. of. (P) Carey and Hurter. (iii, 1884).....                                     | 484  |
| Compounds of Phosphorus, Transformation of Tricalcic<br>Phosphate into. (Rilsan.) (i, 1883)..... | 177  |
| Compounds, Production of. (P) de Dienheim-Brochocli.<br>(xi, 1892).....                          | 813  |
| Cost of Working Electrical Apparatus for Manufacture of.<br>(Haussermann.) (xiv, 1895).....      | 804  |
| Decomposition of Minerals by. (Schelle.) (iii, 1884).....                                        | 652  |

| From Chloride of Magnesium, Production of. (P) Wise.<br>From Solvay and Co. (ix, 1890).....          | 509           |
| From Hydrochloric Acid Gas. (P) Société A. R. Pechiney<br>et Cie. (xi, 1892).....                    | 239           |
| From Solutions of Magnesium Chloride. (P) Schloessing.<br>(vii, 1888).....                           | 626           |
| From Spent Soda Liquors, &c., Production of. (P) Cosnett<br>and others. (xii, 1893).....             | 1031          |
| From Zinc Ore, Producing. (P) Lea and Hammond. (vi,<br>1887).....                                    | 664           |
| Furnace for Continuous Prod. of. (P) Solvay. (vi, 1887).....                                         | 661           |
| Gas, Apparatus for Increasing Bleaching Properties of.<br>(P) Kellner. (xi, 1892).....               | 354           |
| Gas, Application of, as Discharge in Calico-Printing.<br>(Scheurer.) (iii, 1884).....                | 478           |
| Gas, Electrolytic Production of. (P) Drake. (xiii, 1894).....                                        | 744           |
| Gas, Generation of. (P) Vautin. (ix, 1890).....                                                      | 1135          |
| Gas, Manufacture of. (P) Lake. From Le Montcelas.<br>(v, 1886).....                                  | 602           |
| Gas, Pumping and Absorbing. (P) Worsley, Windus, and<br>Bracey. (xiii, 1894).....                    | 810           |
| Heating a Bleach Solution saturated with. (Lunze.) (iv,<br>1885).....                                | 722           |
| Hydrate, Crystallisation of. (Ditte.) (ii, 1883).....                                                | 150           |
| In Bleach Liquor, Estimation of. (Hart.) (i, 1882).....                                              | 308           |
| In Bleaching Materials, Rapid Estim. of. (Baur.) (iii, 1884).....                                    | 259           |
| In Fats, Estimation of Small Quantities of. (Benedikt and<br>Zikes.) (xiii, 1894).....               | 984           |
| In Organic Compounds, Estim. of. (Klason.) (vii, 1888).....                                          | 137           |
| In Spring Waters, Normal. (Haines.) (xiii, 1894).....                                                | 828           |
| In Water, Determination of. (Hazen.) (ix, 1890).....                                                 | 110           |
| In Water, Estimation of. (Farley.) (vii, 1893).....                                                  | 866           |
| In Wine, Determination of. (Siefert.) (xi, 1892).....                                                | 778           |
| Industry, The. (Reychler.) (xi, 1892).....                                                           | 34            |
| Influence of Ammonia-Soda Process on Value of. (Weldon.)<br>(ii, 1883).....                          | 434           |
| Injurious Action of. (Pettenkofer and Lehmann.) (vii,<br>1888).....                                  | 225           |
| Liberation of, during Decomposition of Chlorates by Heat.<br>(Spring and Prost.) (viii, 1889).....   | 460           |
| Liberation of, on Heating Potassium Chlorate and Man-<br>ganese Peroxide. (McLeod.) (xii, 1894)..... | 722           |
| Liquid. (Frisbourg.) (xiii, 1894).....                                                               | 511           |
| Loss of, from Bleaching Powder. (Hattinson.) (vii, 1888).....                                        | 599           |
| Manuf. and Transport of Liquid. (P) Hannay. (ix, 1890).....                                          | 509           |
| Manufacture of:<br>(P) Alsherge. (ix, 1890).....                                                     | 623           |
| (P) Brand. (xii, 1891).....                                                                          | 635           |
| (P) Bryn. (vii, 1888).....                                                                           | 322           |
| (P) Campbell and Boyd. (viii, 1889).....                                                             | 983           |
| (P) Clark. From Dazum. (viii, 1889).....                                                             | 194           |
| (P) Davis. (x, 1891), 546; (xi, 1892), 348, 348<br>(P) Deacon and Hurter. (viii, 1889).....          | 119, 119, 779 |

(iii, 1884)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 626      |
| Alizarin-Blue, Hydroxy-Derivatives of. (Schmidt and Gattermann.) (x, 1891)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 1003     |
| Alizarin-Blue, Obtaining Compounds of. (P) Johnson. From Badische Anilin und Soda Fabrik. (x, 1891)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 358      |

COLOURING MATTERS AND DYES, VARIOUS—*cont.*

|                                                                                                                                                           |          |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Alizarin-Blue, Soluble. (Brinck and Graebe.) (i, 1882)                                                                                                    | 309      |
| Alizarin-Blue, Soluble Compounds of, with Sulphates. (P) Badische Anilin und Soda Fabrik. (ii, 1883)                                                      | 536      |
| Alizarin Derivatives, Production of. (P) Wilcox. From The Farbenfabriken vormals F. Bayer and Co. (x, 1891), 537, 917; (xi, 1892), 1000; (xii, 1893), 596 |          |
| Alizarin-Green Derivatives, Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (viii, 1889)                                            | 772      |
| Alizarin, Manufacture of Dry. (P) Imray. From The Farbwerke vormals Meister, Lucius und Brüning. (xiv, 1895)                                              | 265      |
| Alizarin, Preparation of. (P) Gedge. From Jagenburg and Leverkus. (iv, 1885)                                                                              | 280      |
| Alizarin, Preparation of Artificial. (P) Farbwerke vormals Meister, Lucius und Brüning. (i, 1882)                                                         | 226      |
| Alizarin, Production of New Derivatives of. (P) Wilcox. From The Farbenfabriken vormals F. Bayer and Co. (x, 1891)                                        | 739      |
| Alizarin, Purification of. (P) Bronner. (i, 1882), 499; (ii, 1883), 274                                                                                   | 410      |
| Alizarin, Recovery of, from Residues. (ii, 1883)                                                                                                          | 171      |
| Alizarin, Synthetic Production of, from Hippic Acid. (Lagodzinski.) (xiv, 1895)                                                                           | 860      |
| Alizarin Yellows, Application of. (Werner.) (xi, 1892)                                                                                                    | 599      |
| Alkannin. (Liebermann and Romer.) (vi, 1887)                                                                                                              | 723      |
| Alkyl-Ethers, Manufacture of Acetyl from. (P) Johnson. From Boehringer and Sons. (xiv, 1895)                                                              | 861      |
| Alkyl-Hydroxy-Derivatives of Dimethylamine. (Grizaux.) (x, 1891)                                                                                          | 458      |
| Allocinnamic Acid, Formation of. (Liebermann and Schmolz.) (xi, 1892)                                                                                     | 677      |
| Amethylemmonitro-tone. (Cazeneuve.) (xi, 1892)                                                                                                            | 900, 900 |
| Amethylemmoniphensulphonic acid and its Tetra-nitro Derivative. (Cazeneuve.) (ix, 1890)                                                                   | 853      |
| Amido- and Nitro-Phenols, Preparation of. (P) Deminger. (viii, 1889)                                                                                      | 538      |
| Amido Compounds, Conversion of Aromatic. (Sandmeyer.) (vi, 1887)                                                                                          | 593      |
| Amido Group, Substitution of, by Chlorine, Bromine, and Cyanogen in Aromatic Compounds. (Sandmeyer.) (iv, 1885)                                           | 204      |
| Amido-Alizarin, Preparation of. (Lauth.) (xi, 1892)                                                                                                       | 236      |
| Amidoanthraquinone. (Roemer.) (ii, 1882)                                                                                                                  | 400      |
| Amido-Azo-Derivatives of the Three Xylenes. (Nutting and Forel.) (v, 1886)                                                                                | 27       |
| Amidoazomphthalene, Reduction of. (Friedlander.) (ix, 1890)                                                                                               | 59       |
| Amidochrysene:                                                                                                                                            |          |
| (Abegg.) (ix, 1890)                                                                                                                                       | 600      |
| (Bamberger and Burdard.) (ix, 1890)                                                                                                                       | 605      |
| Amido-Cresol, Conversion of Toluylene-Diamine into a New. (Wallach.) (ii, 1883)                                                                           | 39       |
| Amidodiphenylsulphonic Acid from Diphenyl. (Carnelley and Schlesselman.) (v, 1886)                                                                        | 376      |
| Amido-Guanidine, Treatment of. (P) Johnson. From Badische Anilin und Soda Fabrik. (xii, 1893)                                                             | 142      |
| Amidonaphthalene-Diphenyl Sulphonic Acids, Yellow Dye from. (P) Newburn. From Freund. (iii, 1884)                                                         | 166      |
| Amidonaphthalenesulphonic Acid, $\alpha$ - and $\beta$ . (Cleve.) (x, 1891)                                                                               | 1002     |
| Amidonaphthalenesulphonic Acid, $\delta$ - and $\gamma$ . (Cleve.) (viii, 1889)                                                                           | 116      |
| Amidonaphthalenetetraazobenzene Sulphonic Acids, Preparation of. (P) Bayer and Co. (ii, 1883)                                                             | 172      |
| Amidonaphtholdisulphonic Acid, Manufacture of a New I.S. (P) Abel. From Fischesser and Co. (xiv, 1895)                                                    | 479      |
| Amidonaphtholdisulphonic Acid, Manufacture of. (P) Abel. From Actien Gesellschaft für Anilin Fabrikation. (xiii, 1894)                                    | 32       |
| Amidonaphtholsulphonic Acids, and Dyestuffs therefrom. (P) Pitt. From Cassella and Co. (xi, 1892)                                                         | 345      |
| Amidonaphthol Sulphonic Acids. (Reverdin and de la Harpe.) (xii, 1893)                                                                                    | 749      |
| Amido-para-Cresylmethyl Ether. (Linpach.) (viii, 1889)                                                                                                    | 452      |
| Amidophenol Sulphonic Acids. (Brunner and Kramer.) (iv, 1885)                                                                                             | 51       |
| Amidophenols, Manufacture of. (P) Lake. From Leonhardt and Co. (ix, 1890)                                                                                 | 608      |
| Amido-Triphenylmethanes, Preparation of. (Mühlhauser.) (viii, 1889)                                                                                       | 455      |
| Amines, Action of Sulphur on Primary Aromatic. (Ahschutz and Schultz.) (ix, 1890)                                                                         | 49       |
| Amines, Transformation of Primary, into Mononitro-phenols. (Noelting and Wild.) (iv, 1885)                                                                | 398      |
| Ammonia Derivatives of Hexamethyltriimidiotriphenylmethane. (Rosenthal.) (xiv, 1895)                                                                      | 474      |
| Ammonium Iodide Derivative of Hexamethyltriimidiotriphenylmethane. (Rosenthal.) (ix, 1895)                                                                | 359      |
| Ammonium Salts, Manuf. of. (Mühlhauser.) (xi, 1892)                                                                                                       | 676      |
| Aniline, Action of Acetone upon. (Engler and Richm.) (v, 1886)                                                                                            | 238      |
| Aniline, Action of, on Resorcinol and Quinol. (Calm.) (iii, 1884)                                                                                         | 164      |
| Aniline and Metallic Sulphites, New Compounds of. (Denges.) (x, 1891)                                                                                     | 692      |
| Aniline and $\alpha$ - and $\beta$ -Toluidine, Chlorination and Bromination of. (Hafner.) (ix, 1890)                                                      | 52       |
| Aniline and Perchlormethylmercaptan, Compounds of. (Rathke.) (v, 1886)                                                                                    | 320      |
| Aniline and Toluidine, Apparatus for Production of. (P) Kendall. (ii, 1883)                                                                               | 275      |

COLOURING MATTERS AND DYES, VARIOUS—*cont.*

|                                                                                                                                              |      |
|----------------------------------------------------------------------------------------------------------------------------------------------|------|
| Aniline and Toluidine, Methylation and Ethylation of. (Reinhardt and Stadel.) (ii, 1883) .....                                               | 269  |
| Aniline and Toluidine, Non-Basic By-Products from. (Hell and Roekenbach.) (vii, 1889) .....                                                  | 386  |
| Aniline and Toluidine, Preparation of Derivatives of. (P) Stadel. (ii, 1883) .....                                                           | 242  |
| Aniline Black, Preparation of. (v, 1886) .....                                                                                               | 237  |
| (Gutknecht.) (x, 1891) .....                                                                                                                 | 130  |
| (Lamber and Steinheil.) (i, 1882) .....                                                                                                      | 361  |
| Aniline Black, Preparation of, for Textiles. (P) Aykroyd and Smith. (vi, 1887) .....                                                         | 727  |
| Aniline Black Soluble in Alcohol. (Luttkchemulle.) (i, 1882) .....                                                                           | 222  |
| Aniline Blue Process, Theory of the. (Hirsch.) (viii, 1889) .....                                                                            | 187  |
| Aniline Chromates, Production and Application of. (Girard and L'Hôte.) (vi, 1887) .....                                                      | 653  |
| Aniline, Compound of Chromic Acid with. (Girard and L'Hôte.) (vi, 1887) .....                                                                | 659  |
| Aniline, Manufacture of. (Arnu.) (i, 1882) .....                                                                                             | 353  |
| Aniline, Prod. of. (P) Wirth. From Greiff. (ii, 1883) ..                                                                                     | 475  |
| Aniline, Recovery of, from Waste Liquors. (Grassler.) (iv, 1885) .....                                                                       | 114  |
| Aniline, Separating, from Orthotoluidine. (P) Lewy. (ii, 1883) .....                                                                         | 242  |
| Aniline, Solubility of. (Lidow.) (ii, 1883) .....                                                                                            | 596  |
| Aniline, Sulphonation of, with Acid Potassium Sulphate. (Bischoff.) (ix, 1890) .....                                                         | 562  |
| Aniline, Technical Method of Preparing. (Wohl.) (xiii, 1894) .....                                                                           | 1188 |
| Aniline-Trisulphonic Acid. (Hartshorn and Jackson.) (vii, 1888) .....                                                                        | 669  |
| Anilines, Isobutyl. (iv, 1885) .....                                                                                                         | 398  |
| Anisoles, Constitution of. (Monnet.) (x, 1892) .....                                                                                         | 677  |
| Anatto, Origin and Preparation of. (Vieth.) (iii, 1884) ..                                                                                   | 476  |
| Anthraeic Acid, Manufacture of Monosulphonated. (P) Imray. From Société des Matières Colorantes de St. Denis and Chapuis. (xiii, 1894) ..... | 32   |
| Anthraeic Derivative: Hydroxyanthraquinones. (Olbemann.) (xiv, 1895) .....                                                                   | 262  |
| Anthracinon, Products of Reduction of. (Liebemann.) (i, 1882) .....                                                                          | 398  |
| Anthracinon, Preparation of. (Auerbach.) (ii, 1883) .....                                                                                    | 171  |
| Anthracinon Compounds. (Goldmann.) (ix, 1890) .....                                                                                          | 1027 |
| Anthranol Derivatives. (Goldmann.) (vii, 1888) .....                                                                                         | 671  |
| Anthranoline, Synthesis of. (Graebe.) (iii, 1884) .....                                                                                      | 249  |
| Anthraquinone Compounds, Preparation of. (Engelsing.) (iii, 1884) .....                                                                      | 516  |
| Anthraquinone, Constitution of. (Meyer.) (iii, 1884) ..                                                                                      | 370  |
| Anthraquinone, Conversion of, into Monosulpho Acid of. (P) Levinstein. (iii, 1884) .....                                                     | 29   |
| Anthraquinone Derivatives. (P) Newton. From The Farbenfabriken vormals F. Bayer and Co. (xiv, 1895) ..                                       | 30   |
| Anthraquinone Derivatives. (Perkin.) (viii, 1889) .....                                                                                      | 112  |
| Anthraquinone Derivatives, Manufacture of. (P) Willcox. From The Farbenfabriken vormals F. Bayer and Co. (x, 1891) .....                     | 917  |
| Anthraquinone Derivatives, Production of. (P) Willcox. From Farbenfabriken (vormals F. Bayer and Co. (vii, 1893) .....                       | 596  |
| Anthraquinone Disulphonic Acids, Conversion of, into Flavo- and Anthrapurpurin. (Schmidt.) (x, 1891) ..                                      | 536  |
| Anthraquinone, Formation of. (Friedberg.) (ix, 1890) ..                                                                                      | 1031 |
| Anthraquinone, Manufacture of. (P) Imray. From Poirrier and Rosenstiehl. (vi, 1887) .....                                                    | 595  |
| Anthraquinone, Manufacture of Nitro-Amino. (P) Imray. From Farbwerke vormals Meister, Lucius and Bruning. (xiv, 1895) .....                  | 650  |
| Anthraquinone, Prod. of $\beta$ -. (Lagodzinski.) (xiii, 1894) ..                                                                            | 876  |
| Anthraquinone, Purification of. (P) Brunner. (i, 1882) ..                                                                                    | 699  |
| (ii, 1883) .....                                                                                                                             | 274  |
| Anthraquinone Series, Manuf. of. (Perkin.) (iv, 1885) ..                                                                                     | 432  |
| Anthraquinone, Synthesis of. (Panofovits.) (iii, 1884) ..                                                                                    | 247  |
| Anthrone Compounds. (Goldmann.) (ix, 1890) .....                                                                                             | 1027 |
| Aromatic Bases, Condensation Products of, with Aldehydes. (Fischer and Schmidt.) (iii, 1884) .....                                           | 628  |
| Aromatic Compounds, Influence of Light on Reaction of Halogens on. (Schramm.) (iv, 1885) .....                                               | 398  |
| Aromatic Compounds, New Method of Chlorinating. (Petrieon.) (ix, 1890) .....                                                                 | 731  |
| Aromatic Compounds, Synthesis of. (Friedel and Crafts.) (iv, 1885) .....                                                                     | 114  |
| Aromatic Derivatives of Methane. (Meldola.) (i, 1882) ..                                                                                     | 319  |
| Aromatic Nitroso-Bases: (Kock.) (vii, 1888) .....                                                                                            | 319  |
| (Wacker.) (vii, 1888) .....                                                                                                                  | 318  |
| Atomic Grouping Distinguishing Derivatives of Di- and Triphenylmethane. (Rosenstiehl.) (xiv, 1895) .....                                     | 25   |
| Auramine: (Graebe.) (vii, 1888) .....                                                                                                        | 30   |
| (Kochlin.) (iii, 1884) .....                                                                                                                 | 517  |
| Auramine: A New Yellow. (iii, 1884) .....                                                                                                    | 475  |
| Auramine, Manufacture of. (P) Johnson. From Badische Anilin und Soda Fabrik. (xiii, 1894) .....                                              | 247  |
| Auramines. (Fehrmann.) (vii, 1888) .....                                                                                                     | 117  |
| Auramines, Research on the. (Stock.) (xiii, 1894) .....                                                                                      | 244  |
| Aurin. (Herzig and Smoluchowski.) (xiii, 1894) .....                                                                                         | 798  |
| Aurin, By-Product of Manufacture of. (Staub and Smith.) (ii, 1884) .....                                                                     | 441  |
| Azimid Derivatives. (Noelting and Abel.) (vii, 1888) ..                                                                                      | 562  |
| Azines and Eurdodols, Prod. of. (Zincke.) (xii, 1893) ..                                                                                     | 671  |

COLOURING MATTERS AND DYES, VARIOUS—*cont.*

|                                                                                                                                                |                       |

| (vii, 1888) .....                                                                                                                              | 618                   |
| Azo Bodies, Bromo- and Nitro-Derivatives of. (Janovsky.) (v, 1886) .....                                                                       | 598                   |
| Azo Bodies, Preparation of. (Witt.) (v, 1886) .....                                                                                            | 27                    |
| Azo Colours from Orthosulpho- or Orthocarb- Acid of Benzidine. (P) Abel. From The Actien-Gesellschaft für Anilin-Fabrikation. (vi, 1887) ..... | 138                   |
| Azo Colours from the Diamido Combinations of Ethers of Diphenol. (P) Martius. (vi, 1887) .....                                                 | 139                   |
| Azo Colours, Production of. (P) Martius. (vi, 1887) .....                                                                                      | 437                   |
| Azo Colours, Prod. of Mixed. (P) Martius. (vi, 1887) ..                                                                                        | 138                   |
| Azo Comp., Constitution of Mixed. (Meyer.) (vii, 1888) ..                                                                                      | 203                   |
| Azo Compounds derived from Phenylenediamine. (Wallach and Schulze.) (ii, 1883) .....                                                           | 268                   |
| Azo Compounds from Action of Diazophenols on $\beta$ -Naphthylamine. (Sachs.) (v, 1886) .....                                                  | 28                    |
| Azo Compounds from Salicylic Aldehyde, &c. (Tummeley.) (viii, 1889) .....                                                                      | 609                   |
| Azo Compounds, History of. (Perkin.) (iv, 1885) .....                                                                                          | 435                   |
| Azo Compounds, Laws governing Formation of. (Vanbel.) (xiv, 1895) .....                                                                        | 961                   |
| Azo Comp., Method of Obtaining. (Wallach.) (ii, 1883) ..                                                                                       | 130                   |
| Azo Compounds, Mixed: (Bamberger and Calman.) (v, 1886) .....                                                                                  | 26                    |
| (Beyer and Claissen.) (vii, 1888) .....                                                                                                        | 558                   |
| Azo Compounds of $\beta$ -Naphthylamine, Constitution of. (Zincke.) (v, 1886) .....                                                            | 28                    |
| Azo Comp., Prod. of. (Stadel and Bauer.) (v, 1886) .....                                                                                       | 596                   |
| Azo Compounds with Bisulphites, Prod. of. (P) Haddan. From Frank and Farb. vorm. Bayer and Co. (iv, 1885) ..                                   | 492                   |
| Azo Derivatives. (Kraft.) (iv, 1885) .....                                                                                                     | 398                   |
| Azo Derivatives of $\beta$ -Naphthylamine. (Meldola and Hughes.) (x, 1891) .....                                                               | 693                   |
| Azo Derivatives of Hydroquinone. (Witt and Johnson.) (xiii, 1894) .....                                                                        | 28                    |
| Azo Derivatives of Metaxenol. (Grevink.) (v, 1886) ..                                                                                          | 318                   |
| Azo Derivatives of Phenyl- $\beta$ -Naphthylamine. (Zincke.) (ix, 1890) .....                                                                  | 929                   |
| Azo Derivatives of Pyrocatechol. (Witt and Mayer.) (xii, 1893) .....                                                                           | 592                   |
| Azo Derivatives of Secondary $\beta$ -Naphthylamine. (Matthes.) (ix, 1890) .....                                                               | 929                   |
| Azo Derivatives, Production of Brown. (P) Actien-Gesellschaft für Anilin-Fabrikation. (ii, 1883) .....                                         | 410                   |
| Azobenzene, Substitution Products of. (Janovsky and Erb.) (vi, 1887) .....                                                                     | 435                   |
| Azobenzenes, Derivatives of Isomeric $\alpha$ - and $\beta$ -Naphthol. (Margary.) (iv, 1885) .....                                             | 279                   |
| Azonaphthalene. (Nietzki and Goll.) (iv, 1885) .....                                                                                           | 276                   |
| Azonaphthalene and its Derivatives. (Nietzki and Goll.) (v, 1886) .....                                                                        | 238                   |
| Azonaphthalene, $\beta$ - $\alpha$ -. (Nietzki and Goll.) (vi, 1887) ..                                                                        | 506                   |
| Azonium Bases: (Kehrmann and Messinger.) (x, 1891) .....                                                                                       | 999                   |
| (Witt.) (vi, 1887) .....                                                                                                                       | 543                   |
| (Witt and Schmidt.) (xi, 1892) .....                                                                                                           | 901                   |
| Azo-opiatic Acid. (Liebemann.) (v, 1886) .....                                                                                                 | 319                   |
| Azophenine and Quinone Anilides. (Fischer and Hepp.) (vii, 1888) .....                                                                         | 316                   |
| Azophenines. (Witt.) (vi, 1887) .....                                                                                                          | 594                   |
| Azophenines and Indulines. (Fischer and Hepp.) (vii, 1887) ..                                                                                  | 724                   |
| Azoresoreinol and Azoresorufinol. (Brunner and Krämer.) (iv, 1885) .....                                                                       | 50                    |
| Azotolene, Substitution Products of. (Janovsky and Erb.) (vi, 1887) .....                                                                      | 436                   |
| Azoxy Compounds of Aromatic Series, Manufacture of. (P) Loesner. (xiv, 1895) .....                                                             | 31                    |
| Azoxybenzene. (Molcanowski.) (ii, 1883) .....                                                                                                  | 268                   |
| Azoxylenes, Diamidolixyls, and Colouring Derivatives of the Latter. (Noelting and Stricker.) (viii, 1889) .....                                | 114                   |
| Azoxytoluene, Obtaining $\alpha$ -. (Klinger and Pitschke.) (iv, 1885) .....                                                                   | 741                   |
| Azylines, Preparation of. (Noelting.) (iv, 1885) .....                                                                                         | 397                   |
| Base derived from Benzylisodiphenylamine. (Bernthsen.) (ii, 1883) .....                                                                        | 171                   |
| Bases, Action of Aromatic on Meldola's Blue. (Hirsch and Kalkhoff.) (ix, 1890) .....                                                           | 1120                  |
| Bases and Sulpho Acids, Manuf. of. (P) Abel. From The Actien-Gesellschaft für Anilin-Fabrikation. (xiv, 1895) ..                               | 203                   |
| Bases and their Sulpho Acids, Prod. of. (P) Abel. From Actien-Gesellschaft für Anilin-Fabrikation. (xiii, 1894) ..                             | 1055                  |
| Bases, Condensation Products of Tertiary Aromatic. (Fischer.) (i, 1882) .....                                                                  | 23                    |
| Bases, Hexamethyltriamidodiphenylmethane Ammonium. (Rosenstiehl.) (xiv, 1895) .....                                                            | 859                   |
| Bases, Nitrosamines and Nitroso. (Fischer and Hepp.) (vi, 1887) .....                                                                          | 723                   |
| Bases of Methyl-Violet and Magenta. (Wichelhaus.) (v, 1886) .....                                                                              | 318                   |

| Bases, Reaction of the Acid Sulphates of Aromatic. (Vaznon.) (vii, 1888).....                                                     | 714  |
| Bases, Sulphonation of Rosaniline. (Mühlhauser.) (viii, 1889).....                                                                | 275  |
| Benzaldehyde, Action of Sulphur on. (Barbaglia and Marquardt.) (x, 1891).....                                                     | 829  |
| Benzaldehyde, Compounds of, with Aniline Hydrochloride and Stannic Chloride. (Elbers.) (iv, 1885).....                            | 395  |
| Benzaldehyde Green, Mannf. of. (Mühlhauser.) (vi, 1887).....                                                                      | 433  |
| Benzaldehyde, Preparation of. (P) Schmidt. (ii, 1883).....                                                                        | 274  |
| Benzene Derivatives, Nitration of. (Spindler.) (ii, 1883).....                                                                    | 373  |
| Benzene-azo- $\alpha$ -Naphthylglycine. (Donner.) (x, 1891).....                                                                  | 1002 |
| Benzenetriphenazine. (Nietzki and Schmidt.) (vi, 1888).....                                                                       | 384  |
| Benzenetrisulphonic Acid. (Jackson and Wing.) (v, 1886).....                                                                      | 377  |
| Benzidine, Derivatives of. (Brunner and Witt.) (vi, 1887).....                                                                    | 542  |
| Benzidine, Preparation of. (Erdmann.) (xii, 1893).....                                                                            | 669  |
| Benzidine Sulphate, Prep. of. (Teichmann.) (xii, 1893).....                                                                       | 515  |
| Benzidine- <i>m</i> -Monosulphonic Acid, Derivatives of. (Zehra.) (x, 1891).....                                                  | 42   |
| Benzidine- <i>o</i> -Disulphonic Acid, Production of. (Limprieh.) (x, 1891).....                                                  | 630  |
| Benzol, Manufacture of Para-dioxy-, in Yellow Crystals. (P) Meyer. (viii, 1889).....                                              | 457  |
| Benzophenone Homologues, Prep. of. (Elbers.) (v, 1886).....                                                                       | 321  |
| Benzotrifluoride, Dehalogenism. (Auerbach.) (ii, 1883).....                                                                       | 171  |
| Benzotrifluoride with Phenols and Phenylamines, Compounds of. (Dobner.) (ii, 1883).....                                           | 272  |
| Benzoylactic Acid. (Baeyer.) (i, 1882).....                                                                                       | 495  |
| Benzyl Chloride, Action of, on Metaxylidine. (Jablen-Gonnet.) (xi, 1892).....                                                     | 236  |
| Benzylanthracenedihydride. (Bach.) (ix, 1890).....                                                                                | 1027 |
| Benzylidihydroxypyridine, Formation of, from Benzylglutamic Acid. (Ruhemann.) (xii, 1893).....                                    | 141  |
| Benzylphenylenediamine, Production of $\alpha$ - and $\beta$ -. (Koll.) (x, 1891).....                                            | 829  |
| Benzylloxanthranol. (Bach.) (ix, 1890).....                                                                                       | 1027 |
| Benzyltrichloride, Combinations of, with Phenols. (Dobner.) (ix, 1890).....                                                       | 496  |
| Benzyl-Violet, Mannf. of. (Mühlhauser.) (viii, 1889).....                                                                         | 40   |
| Berlin Blue, Prep. of Soluble. See Prussian Blue.                                                                                 |      |
| Betanaphthol and Benzaldehyde, Condensation Product of. (Trzinsky.) (iii, 1884).....                                              | 246  |
| Betanaphthol- and Betanaphthylaminedisulphonic Acids R and G. (Armstrong and Wynne.) (ix, 1890).....                              | 283  |
| Betanaphthol Carbon Acid, Manufacture of a New. (P) Johnson. From von Heyden Nachfolger. (ix, 1890).....                          | 609  |
| Betanaphthol- $\alpha$ -mono- and Disulphonic Acids. (Pützinger and Duisberg.) (viii, 1889).....                                  | 384  |
| Betanaphthol- $\alpha$ -mono-sulphonic Acid. (Witt.) (viii, 1889).....                                                            | 277  |
| Betanaphthol- $\alpha$ -sulphonic Acid. (Nietzki and Zuhlen.) (viii, 1889).....                                                   | 386  |
| Betanaphthylamine- $\alpha$ -sulphonic Acid: (Forstling.) (viii, 1889).....                                                       | 387  |
| (Immerheiser.) (viii, 1889).....                                                                                                  | 385  |
| Binitronephtholmonosulphonic Acid, Preparation of. (P) Farbwerke vormals Meister, Lucius, and Brünig. (ii, 1883).....             | 536  |
| Blue and Acid Violet N. Patent. (Ulrich.) (ix, 1890).....                                                                         | 384  |
| Blue Derivative of Morphine. (Chastang and Rabillot.) (vii, 1888).....                                                            | 319  |
| Brasilin. (Buchka and Erek.) (iv, 1885).....                                                                                      | 397  |
| Brasilin and Hematoxylin. (Herzig.) (xii, 1894).....                                                                              | 797  |
| Brasilin Derivative, A New. (Schall and Dralle.) (vii, 1888).....                                                                 | 117  |
| Brasilin, Studies on. (Schall and Dralle.) (viii, 1889).....                                                                      | 699  |
| Bromanil, Prod. of. (Graebe and Welter.) (x, 1891).....                                                                           | 691  |
| Bromisatine Blue and the Compounds of Mono- and Dibromisatine with Piperidine. (Schotten.) (x, 1891).....                         | 1002 |
| Bromonaphthalenesulphonic Acids, Two $\beta$ -. (Forstling.) (viii, 1889).....                                                    | 699  |
| Butaldehyde, Condensation of Normal. (Kahn.) (v, 1886).....                                                                       | 161  |
| Camarin. (Durand and Huguenin.) (iii, 1884).....                                                                                  | 476  |
| Carbazol Blue. (Bamberger and Muller.) (vi, 1887).....                                                                            | 690  |
| Carbazole, Formation of. (Mazzara.) (x, 1891).....                                                                                | 356  |
| Carbazole, Synthesis of. (Blank.) (x, 1891).....                                                                                  | 356  |
| Carbines, Chromogenic, and Constitution of Rosaniline Salts. (Richter.) (viii, 1889).....                                         | 117  |
| Carbizines, Constitution of the. (Freund and Kull.) (ix, 1890).....                                                               | 1030 |
| Carbonaphthol Acid Alkaline Salts, Manufacture of $\alpha$ - or $\beta$ -. (P) Johnson. From Kolbe and Rentsch. (v, 1886).....    | 482  |
| Carbonaphthol Acid Alkaline Salts, Production of $\alpha$ - or $\beta$ -. (P) Kolbe and Rentsch. (iv, 1885).....                  | 531  |
| Carboxylic Acids, Hydrazine Derivatives of. (Noelting.) (xi, 1892).....                                                           | 343  |
| Carboxylic Acids of Dimethylaniline. (Lauth.) (xiii, 1894).....                                                                   | 629  |
| Cascarin. (Leprince.) (xii, 1893).....                                                                                            | 513  |
| Cassella's $\beta$ -Naphthylamine- $\delta$ -disulphonic Acid, Constitution of. (Armstrong and Wynne.) (ix, 1890).....            | 800  |
| Chay Root, Colouring Principles in. (Perkin and Hummel.) (xiii, 1894).....                                                        | 244  |
| Chloral-hydrate, Condensation of, with Tertiary Amines. (Boessneck.) (iv, 1885).....                                              | 491  |
| Chloranil, Production of. (Graebe.) (x, 1891).....                                                                                | 691  |
| Chlorbenzaldehyde and Chlor-indigo. (Gnehm.) (iii, 1884).....                                                                     | 411  |

| F. Bayer and Co., (xii, 1893) .....                        | 230           |
| Dinitro-Chlorotoluene in Synthesis of Azine,               |               |
| (Nietzki and Rehe,) (xi, 1895) .....                       | 138           |
| Diphenylmethane, (Albrecht,) (xiv, 1895) .....             | 475           |
| Direct-dyeing, (Welter,) (xi, 1892) .....                  | 981           |
| Direct-dyeing, Production of:                              |               |
| (P) Abel, From The Actiengesellschaft für                  |               |
| Anilin Fabrikation, (xiv, 1895) .....                      | 861, 861, 862 |
| (P) Newton, From The Farbenfabriken vormals                |               |
| Bayer and Co. (xiii, 1894) .....                           | 245           |
| (P) Wilcox, From The Farbenfabriken vormals                |               |
| Bayer and Co. (ix, 1890) .....                             | 1032          |
| Direct-dyeing Yellow, Production of, (P) Brooke            |               |
| and others, (xiv, 1895) .....                              | 266           |
| Disazo and Tetrazo, (viii, 1889) .....                     | 279           |
| Disazo, Production of:                                     |               |
| (P) Johnson, From The Badische Anilin und                  |               |
| Soda Fabrik., (ix, 1890) .....                             | 854           |
| (P) Pitt, From Cassella and Co. (xiii, 1894) 246, 246      |               |
| Dyeing Blue with Mordants, Manufacture of, (P)             |               |
| Abel, From The Actiengesellschaft für Anilin               |               |
| Fabrikation, (xii, 1894), 1189; (xiv, 1895), 747, 748      |               |
| Dyeing Cotton without Mordant, Production of, (P)          |               |
| Rohrer, (xii, 1893) .....                                  | 351           |
| Dyeing on Unmordanted Cotton, (P) Petersen-Mul-            |               |
| ler, (xiii, 1894) .....                                    | 725           |
| Dyeing Properties of Benzidine Azo, (Mohlan,) (v,          |               |
| 1886) .....                                                | 597           |
| Dyeing Sand with Azo, (Mohlan,) (xii, 1893) .....          | 675           |
| Dyeing with Mordants, (P) Heyes, From Sandoz               |               |
| and Co. (xiii, 1894) .....                                 | 631           |
| Effect of Metallic Salts in Development of, (Caberti       |               |
| and Pecci,) (xii, 1894) .....                              | 946           |
| Employed in Brewing, (Evans,) (xiv, 1895) .....            | 673           |
| Eosin, Production of, (Mühlhauser,) (vi, 1887) .....       | 283           |
| Estimation of, by Absorption Spectra, (Patterson,) (ix,    |               |
| 1890) .....                                                | 36            |
| Estimation of Triphenylmethane, with Nascent Bro-          |               |
| mine, (Vanbel,) (xiv, 1895) .....                          | 196           |
| Etherification of Sulphonated, (Friedhumm,) (xiv,          |               |
| 1895) .....                                                | 28            |
| Exposed to Light, Action of Copper on, (Schoen,) (xii,     |               |
| 1893) .....                                                | 443           |
| Fast Azo, on Fibre, Production of, (P) Imray,              |               |
| From The Farbwerke vormals Meister, Lucius und             |               |
| Brünig, (xiv, 1895) .....                                  | 966           |
| Fast Yellow Azo, Production of, (P) Imray, From            |               |
| The Farbwerke vormals Meister, Lucius und Brünig,          |               |
| (xi, 1892) .....                                           | 545           |
| Fastness of on Textiles, (Joffre,) (vii, 1888) .....       | 674           |
| Fixing Aniline, (Blanche,) (iii, 1884) .....               | 166           |
| Fixing Organic, on Fibres, (P) Schevelin and Mun-          |               |
| dovsky, (ix, 1890) .....                                   | 612           |
| For Cotton, (Erdmann,) (vi, 1887) .....                    | 816           |
| For Cotton, A Blue, (Müller,) (vi, 1887) .....             | 215           |
| For Dyeing and Printing:                                   |               |
| (P) Dreyfus, (xi, 1890) .....                              | 286           |
| (P) Durand, Huguenin, and d'Andiran, (xiii,                |               |
| 1894) .....                                                | 1055          |
| (P) Read Holliday and Sons, Ltd., and Holliday,            |               |
| (xiii, 1894) .....                                         | 511           |
| For Dyeing and Printing, Production of, (P) John-          |               |
| son, From Caro, (vii, 1888) .....                          | 745           |
| For Dyeing, Printing, &c., (P) Chadwick, (vii, 1888) ..... | 521           |
| For Glass, Composition of, (Hüttensaur,) (x, 1891) .....   | 710           |
| For Jute and Leather, Manufacture of, (P) Lake,            |               |
| From Oehler, (x, 1891) .....                               | 831           |
| For Painting, &c., (P) Nienstaedt and others, (xiii,       |               |
| 1894) .....                                                | 648           |
| For Photographs, Manufacture of, (P) Boult, From           |               |
| Bruns, (xi, 1892) .....                                    | 679           |
| For Wine, (vi, 1887) .....                                 | 830           |
| For Wines and Liqueurs, (iii, 1884) .....                  | 517           |
| For Wool-dyeing, Production of, (P) Imray, From            |               |
| The Farbwerke vormals Meister, Lucius und                  |               |
| Brünig, (x, 1891) .....                                    | 633           |
| For Wool, Manufacture of Black-Blue to Black               |               |
| Disazo, (P) Imray, From Society of Chemical                |               |
| Industry in Basle, (xiv, 1895) .....                       | 1042          |
| For Wool, Production of, (P) Wilcox, From The              |               |
| Farbenfabriken vormals Bayer and Co. (xii, 1893) .....     | 350           |
| Formation of Acridine, (Mohlan and Fritzsche,) (xii,       |               |
| 1893) .....                                                | 750           |

| From Amidonaphtholsulpho Acid. (P) Newton. From Farbenfabriken vormals Bayer. (xiii, 1894).....                                                        | 913  |
| From Amidonaphtholsulpho Acid. (P) Pitt. From Cassella and Co. (xiii, 1894).....                                                                       | 244  |
| From Amidonaphtholsulpho Acids. (P) Newton. From Farbenfabriken vormals Bayer. (xiii, 1894).....                                                       | 800  |
| From Amidonaphtholsulphonic Acid, Production of. (P) Pitt. From Cassella and Co. (ix, 1890), 955; (xi, 1892).....                                      | 711  |
| From Aniline. (P) Pinkey. (vii, 1888).....                                                                                                             | 31   |
| From Anthraquinone:<br>(P) Newton. From Farbenfabriken vormals Bayer and Co. (xii, 1893), 755; (xiii, 1894), 723, 1190<br>(P) Walder. (vii, 1888)..... | 32   |
| (P) Wilcox. From Farbenfabriken vormals Bayer. (vi, 1892), 513, 740; (xii, 1893), 142; (xiv, 1895), 30                                                 |      |
| From Anthraquinone and Alizarin Blue. (P) Wilcox. From Farb. vormals Bayer and Co. (xi, 1892).....                                                     | 514  |
| From Anthraquinone-Disulphonic Acid. (vii, 1888).....                                                                                                  | 116  |
| From Azoxyaniline, Manufacture of. (P) Imray. From La Société des Matières Colorantes, &c. (ix, 1890).....                                             | 1124 |
| From Benzidine. (P) Wilcox. From Farbenfabriken vormals Bayer and Co. (xi, 1892).....                                                                  | 516  |
| From Benzidine Tetrabenzyl Ether. (Colson.) (viii, 1889).....                                                                                          | 451  |
| From Betanaphthylhydroquinone, Production of. (P) Newton. From Farb. vorm. Bayer. (xii, 1894).....                                                     | 31   |
| From $\beta$ -Naphthol, Preparation of. (i, 1882).....                                                                                                 | 399  |
| From Betanaphtholmonosulphonic Acids. (P) Wetter. From Leipziger Anilinfabrik. (iv, 1885).....                                                         | 339  |
| From Betanaphthylaminesulphonic Acid. (P) Green. (viii, 1889).....                                                                                     | 878  |
| From Betanaphthylaminesulphonic Acids. (P) Farbfabrikate Lohr. (ii, 1889).....                                                                         | 593  |
| From $\beta$ -resorcylic Acid. (P) Muhlert. (xiii, 1894).....                                                                                          | 632  |
| From Carboethoxyhexabromide. (Holl and Urech.) (ii, 1883).....                                                                                         | 376  |
| From Chloroiodine Bases, Manufacture of. (P) Ostermeyer and Dittmar. (iv, 1885).....                                                                   | 453  |
| From Chrysamine. (Trillat and Raczkowski.) (xi, 1892).....                                                                                             | 737  |
| From Coal-Tar Products. (P) Kendall. (viii, 1889).....                                                                                                 | 702  |
| From Coal-Tar Quinoline, Preparation of. (Spalteholz.) (iii, 1884).....                                                                                | 25   |
| From Condensation Products of Formic Aldehyde with Benzidine, &c. (P) Durand, Huguenin, and D'Andrau. (xii, 1893).....                                 | 756  |
| From Cotton-Seed Oil. (P) Tall and Thompson. (vii, 1888).....                                                                                          | 756  |
| From Derivatives of Tannin and Catechin. (P) Durand and others. (viii, 1889).....                                                                      | 981  |
| From Di- and Tri-Anilines. (Grevinck.) (iv, 1885).....                                                                                                 | 400  |
| From Diamido Base, Production of. (P) Imray. From The Farbwerke vormals Meister, Lucius und Brüning. (xiii, 1894).....                                 | 384  |
| From Diamido-Dibenzimidazols. (P) Imray. From The Farbwerke vormals Meister, Lucius und Brüning. (xiii, 1894).....                                     | 941  |
| From Diamidodicylyls. (Nolting and Stricker.) (viii, 1889).....                                                                                        | 111  |
| From Diamidoethoxy-diphenyl Sulphonic Acid. (Feer.) (vii, 1888).....                                                                                   | 839  |
| From Diazo Compounds with Resorcin Azo Compounds. (P) Aetienges. für Anilin Fab. (i, 1882).....                                                        | 104  |
| From Dihydroxybenzoic Acid, Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (x, 1891).....                                       | 759  |
| From Dimethylaniline and Chloranil. (Wichellhaus.) (iii, 1884).....                                                                                    | 26   |
| From Dioxynaphthylmethane. (P) Durand, Huguenin, and D'Andrau. (xii, 1893).....                                                                        | 756  |
| From Dioxynaphthalene-mono-sulpho Acid. (P) Imray. From Basle Chemical Works Bindschedler. (xiii, 1894).....                                           | 632  |
| From Dioxynaphthoic-mono-sulpho Acid. (P) Imray. From Basle Chemical Works Bindschedler. (xiii, 1894).....                                             | 632  |

|-------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| From Diphenylmethane Derivatives, Production of. (Walter.) (xiv, 1895).....                                                                     | 711      |
| From Dyewood Extracts. (P) Willis. From Matheson. (xiii, 1894).....                                                                             | 1190     |
| From Eserine. (Da Silva.) (xiii, 1894).....                                                                                                     | 69       |
| From Formaldehyde. (Trillat.) (xii, 1893).....                                                                                                  | 752      |
| From Formaldelyde. (Schiff.) (v, 1886).....                                                                                                     | 377, 598 |
| From Glucosides, Tannin, and Bitter Principles, Production of. (P) Wise. From Knoop. (iv, 1885).....                                            | 267      |
| From Imido-Compound of Fluorescein Chloride, Production of. (P) Imray. From The Farbwerke vormals Meister, Lucius, and Brüning. (ix, 1890)..... | 385      |
| From Lepidine. (Hoogewerff and van Dorp.) (iv, 1885).....                                                                                       | 339      |
| From Leuco Compounds. (P) Newton. From Farbenfabriken vormals Bayer and Co. (xiii, 1894).....                                                   | 722      |
| From Logwood, Manufacture of:<br>(P) Alexander. From Wells. (xii, 1893).....                                                                    | 598      |
| (P) Matheson and Co. (xiv, 1895).....                                                                                                           | 267      |
| From Meta-amidophenolphthalenes, Production of. (P) Imray. From Farbwerke vormals Meister, Lucius, and Brüning. (xiii, 1894).....               | 799      |
| From Metamidocresol. (iv, 1885).....                                                                                                            | 399      |
| From Monamines and Paradiamines. (Nietzki.) (iii, 1884).....                                                                                    | 250      |
| From Monosulphonic Acid of $\beta$ -Naphthol, Production of. (P) Farbenfabriken vormals Bayer and Co. (i, 1882).....                            | 224      |
| From Morphine. (Cazeneuve.) (x, 1891).....                                                                                                      | 754      |
| From Muscarine, Production of. (P) Durand and others. (xiv, 1895).....                                                                          | 651      |
| From Naphthalene:<br>(P) Johnson. From Badische Anilin und Soda Fabrik. (xiii, 1894).....                                                       | 630      |
| (P) Wirth. From Dittler and Co. (iii, 1884).....                                                                                                | 243      |
| From Naphthalene Derivatives. (P) Johnson. From Badische Anilin und Soda Fabrik. (xiii, 1894).....                                              | 144      |
| From Naphthalene Disulphonic Acids. (P) Mewburn. From Freund. (iii, 1884).....                                                                  | 166      |
| From Naphthalene, Production of. (P) Peters. (x, 1891).....                                                                                     | 359      |
| From Naphtholsulphonic Acids. (P) Wetter. From Leipziger Anilin Fabrik. (iv, 1885).....                                                         | 339      |
| From Naphtholtrisulphonic Acid, &c. (P) Imray. From Koch. (x, 1891).....                                                                        | 538      |
| From Naphthylene-diamine Mono-sulpho Acid. (P) Abel. From The Aetiengesellschaft für Anilin Fabrikation. (xiv, 1895).....                       | 361      |
| From Naphthylene-diamine Disulphonic Acid. (P) Abel. From Aetiengesellschaft für Anilin Fabrikation. (xiv, 1895).....                           | 263      |
| From Naphthyl-glycines. (P) Porthelm. (xi, 1892).....                                                                                           | 236      |
| From New Bases. (P) Abel. From Aetiengesellschaft für Anilin Fabrikation. (xi, 1893).....                                                       | 112, 143 |
| From Nitro-derivatives of Naphthalene, Formation of. (P) Meister, Lucius, and Brüning. (i, 1882).....                                           | 24       |
| From Nitroso Compounds. (P) Johnson. From The Badische Anilin und Soda Fab. (vii, 1889).....                                                    | 280      |
| From Ortho-diamidostilbene, Azo-. (Bischoff.) (vii, 1888).....                                                                                  | 669      |
| From Oxyulphonates of Naphthalene. (P) Imray. From The Farbwerke vormals Meister, Lucius, and Brüning. (ix, 1890).....                          | 609      |
| From Paradiamidodiphenylpiperazine. (Lellmann and Schleich.) (viii, 1889).....                                                                  | 699      |
| From Paranitrobenzaldehyde, Preparation of. (P) Fischer. (i, 1882).....                                                                         | 145      |
| From Paranitrotoluene, Production of. (P) Lake. From Wirth and Co. (vi, 1887).....                                                              | 507      |
| From Paratoluidine, &c., Production of. (P) Imray. From La Société Anonyme des Matières Colorantes de St. Denis. (ix, 1890).....                | 934      |

| 1893).....                                           | 526      |
| Of Lac Dye. (Schmidt.) (vi, 1887).....               | 266, 861 |
| Of Madder, Researches on. (Wurtz.) (ii, 1883).....   | 143      |
| Of Magenta Group. (Prud'homme and Rabaut.)           |          |
| (xiii, 1894).....                                    | 659      |
| Of Mixed Naphtholsulphonic Acids, Azo-Separation     |          |
| of. (Dahl and Co.) (iii, 1884).....                  | 271      |
| Of Plants. (Benedikt.) (iii, 1884).....              | 382      |
| Of Red Carboic Acid. (Fahm.) (x, 1891).....          | 516      |
| Of Red Wines. (Heise.) (ix, 1890).....               | 515      |
| Of Rosaniline and Pararosaniline Series, Manufacture |          |
| of. (P) Wirth. From Erlenneyer. (iv, 1885).....      | 453      |
| Of Rosaniline Series, Production of Blue and Violet. |          |
| (P) Abel. From The Farbwerke vormals Meister,        |          |
| Lucius, and Brünig. (iv, 1885).....                  | 91       |
| Of Safranine Group. (Netzki.) (ii, 1883).....        | 205      |
| Of Sophora Japonica, Capparis Spinosa, and Ruta      |          |
| Graveolens. (i, 1882).....                           | 204      |
| Of the Acridine Series, Manufacture of. (P) Lake.    |          |
| From Leonhardt. (x, 1891).....                       | 271      |
| Of the Anthraquinone Series. (Schmidt.) (x, 1891)    |          |
| Of the Auramine Class. Manuf. of. (P) Johnson.       |          |
| From "The Badische Anilin und Soda Fabrik."          |          |
| (xii, 1893).....                                     | 315      |
| Of the Benzene Group. (Hennmann and Rey.) (ix,       |          |
| 1890).....                                           | 537      |
| Of the Fluorescein Group. (Mohlan and Koch.)         |          |
| (xiv, 1895).....                                     | 536      |
| Of the Gallocyan Root. (Johns.) (i, 1882).....       | 441      |
| Of the Indian Dye-stuff "Tesu." (Hammel and          |          |
| Cavallo.) (xiii, 1894).....                          | 189      |
| Of the Indigo Group. (P) Johnson. From The           |          |
| Badische Anilin und Soda Fabrik. (xiv, 1895).....    | 475      |
| Of the Induline Series, Manufacture of a New. (P)    |          |
| Imray. From The Farbwerke vormals Meister,           |          |
| Lucius, and Brünig.....(ix, 1890), 698; (x, 1891),   |          |
| Of the Naphthylamine Series, Reduction Products      |          |
| from Azo. (Witt.) (viii, 1889).....                  | 315      |
| Of the Oxycetone Group, Preparation of. (P)          |          |
| Johnson. From The Badische Anilin und Soda           |          |
| Fabrik.....(ix, 1890), 497, 497, 609; (x, 1891),     |          |
| Of the Phthalene Group, Manufacture of. (P)          |          |
| Imray. From Basle Chemical Works Bindschedler.       |          |
| (xiv, 1895).....                                     | 276      |
| Of the Rosaniline Group, Constitution of. (Rosen-    |          |
| stiehl.) (xii, 1893).....                            | 539      |
| Of the Rosaniline Group, Preparation of. (P)         |          |
| Greiff. (i, 1882).....                               | 591      |
| Of the Rosaniline Group, Preparation of, from Nitro- |          |
| luceco Bases of Triphenylmethane. (P) Fischer.       |          |
| (i, 1882).....                                       | 21       |
| Of the Safranin Group:                               |          |
| (Bindschedler.) (iii, 1884).....                     | 146      |
| (Netzki.) (iii, 1884).....                           | 27       |
| Of the Triphenylmethane Group:                       |          |
| (Hofmann.) (xii, 1893).....                          | 27       |
| (Noelting.) (ix, 1890).....                          | 748      |
| (Noelting, Polonowsky, and Skawinski.) (xi,          |          |
| 1892).....                                           | 52, 279  |
|                                                      | 25       |

|------------------------------------------------------------------------------------------------------------------------------|---------------|
| Related to Methylene Blue. (Bernthsen.) (iv, 1885)                                                                           | 276, 277, 277 |
| Related to the Indulines and Eurlhodines. Manufacture of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (xiv, 1895) | 566           |
| Related to the Rhodamine Series. (P) Johnson. From The Badische Anilin und Soda Fabrik. (xiii, 1894)                         | 1191          |
| Report on New. (Knecht.) (ix, 1890)                                                                                          | 53            |
| Researches on Constitution of, Analogous to Magenta. (Rosenstiehl.) (xii, 1893)                                              | 718           |
| Resembling Indophenols. (Mohlau.) (iii, 1881)                                                                                | 236           |
| Resembling Indulines. (P) Abel. From Farberwerke vormals Meister, Lucius, and Bruning. (viii, 1889)                          | 878           |
| "Resinate." The. (Muller-Jacobs.) (viii, 1889)                                                                               | 770           |
| Resinous, from Oils, Production of. (P) Hunt. (ix, 1890)                                                                     | 1045          |
| Resorcin. (Hamm and Schneider.) (i, 1882)                                                                                    | 181           |
| Revision of Laws concerning, and the making of Noxious Colours. (Cazenove.) (vi, 1887)                                       | 816           |
| "Rhodamine." Production of:<br>(P) Abel. From Farberwerke vormals Meister, Lucius and Bruning. (viii, 1889)                  | 567           |
| (P) Imray. From The Society of Chemical Industry, Basle. (x, 1891)                                                           | 459           |
| Salicylic Acid Azo-. (Bona.) (xiii, 1894)                                                                                    | 381           |
| Scheme for Detection of Artificial. (Weingartner.) (vi, 1887)                                                                | 151           |
| Scheme for Detection of Organic. (Witt.) (v, 1886)                                                                           | 249           |
| Separ. of Solid Matter from. (P) Reid. (vii, 1888)                                                                           | 121           |
| Soluble Blue, Production of:<br>(P) Imray. From La Societe des Matieres Colorantes et Chapuis. (x, 1891)                     | 132           |
| (P) Lake. From Oehler. (x, 1891)                                                                                             | 132           |
| Solutions of, Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (vi, 1887)                               | 437           |
| Substances from Turmeric. (Jackson and Menke.) (i, 1882)                                                                     | 355           |
| Substances used in Production of. (P) Kern. (vi, 1887)                                                                       | 508           |
| Substantive Cotton, Production of. (P) Dawson and Hirsch. (x, 1891)                                                          | 133           |
| Substantive, Production of. (P) Durand, Huguenin, and d'Andiran. (xiii, 1894)                                                | 802           |
| Sulpho Acids of Naphthalene, Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (x, 1891)                 | 831           |
| Sulpho, Production of, by Electrolysis. (P) Capitaine. From Ewer and Pick. (iv, 1885)                                        | 453           |
| Synthesis of Indigo and other. (Heumann.) (ix, 1890)                                                                         | 1121          |
| Tabular Survey of the Artificial Organic. (Schultz and Julius.) (vi, 1887)                                                   | 653, 721      |
| Tests of, for Fastness to Light and Resistance to Lime. (Stossel.) (ix, 1890)                                                | 936           |
| Tetrazo, Production of:<br>(P) Durand, Huguenin, and d'Andiran. (xiii, 1894)                                                 | 146           |
| (P) Newton. From The Farbenfabriken vormals Bayer and Co. (xiii, 1894)                                                       | 511           |
| (P) Thompson and Moore. (xiii, 1894)                                                                                         | 384           |
| Tetrazole, Production of. (P) Imray. From La Societe des Matieres Colorantes et Produits Chimiques de St. Denis. (vii, 1888) | 563           |
| Theory of Formation of. (Basilowski.) (vii, 1888)                                                                            | 384           |
| "Thiamines." Prod. of. (P) Bennert. (vii, 1887)                                                                              | 726, 726      |
| Thionine, Production of. (P) Imray. From Farberwerke vormals Meister, Lucius, and Bruning. (xiii, 1894)                      | 247           |
| To Dye Cotton without Mordant, Manufacture of. (P) Abel. From The Actien Gesellschaft fur Anilin Fabrikation. (xiv, 1895)    | 861           |
| Transformation of Diphenylmethane Derivatives into. (Walter.) (xiv, 1895)                                                    | 714           |
| Triphenylmethane, Investigation of. (Haller and Muller.) (xiv, 1895)                                                         | 859           |
| Triphenylmethane, Production of:<br>(P) Pitt. From Cassella and Co. (xi, 1892)                                               | 28            |
| (P) Shillito. From Geigy and Co. (ix, 1890)                                                                                  | 172           |
| Unsymmetrical Acid Green, Production of. (P) Wilcox. From The Farbenfabriken vormals Bayer and Co. (ix, 1890)                | 285           |
| Violet. (P) Koehlin. (i, 1882)                                                                                               | 225           |
| Violet and Blue, Prep. of. (P) Majert. (i, 1882)                                                                             | 402           |
| Violet and Blue, Production of. (P) Abel. From The Farberwerke vormals Meister, Lucius, and Bruning. (iv, 1885)              | 339, 400      |
| Violet, from Paramidophenol. (Lauth.) (iv, 1885)                                                                             | 398           |
| Violet, from Residues of Gas Purifiers. (Gasch.) (ix, 1890)                                                                  | 923           |
| Violet, Production of:<br>(P) Abel. From The Actien Gesellschaft fur Anilin Fabrikation. (x, 1891)                           | 358           |
| (P) Haddan. From Hassenkamp and Farbenfabriken vormals Bayer and Co. (iv, 1885)                                              | 205           |
| (P) Shillito. From Geigy and Co. (viii, 1889)                                                                                | 981           |
| Weselsky's Resorcinol. (Nietzki and others.) (ix, 1890)                                                                      | 489           |
| Which Combine with Mordants. (Kostanecki.) (vii, 1888)                                                                       | 33, 33        |
| Which Dye Mordanted Fibres. (Kostanecki.) (viii, 1889)                                                                       | 698           |

|                                                                                                                                  |           |
|----------------------------------------------------------------------------------------------------------------------------------|-----------|
| Yellow. (P) Grassl. (i, 1882)                                                                                                    | 225       |
| Yellow and Brown, Production of. (P) Nietzki. (vii, 1888)                                                                        | 839       |
| Yellow and Orange, Production of:<br>(P) Imray. From La Societe des Matieres Colorantes et others. (iii, 1884)                   | 319       |
| (P) Johnson. From The Badische Anilin und Soda Fabrik. (v, 1886)                                                                 | 427       |
| (P) Lake. From Oehler. (viii, 1889)                                                                                              | 156       |
| Yellow Basic, Production of:<br>(P) Imray. From Farberwerke vormals Meister, Lucius, and Bruning. (xiv, 1895)                    | 800       |
| (P) Imray. From The Society of Chemical Industry, Basle. (x, 1891)                                                               | 132       |
| Yellow, Blue, and Violet, Production of. (P) Lake. From Vignon and Co. (iv, 1885)                                                | 453, 454  |
| Yellow, from Carbazol, Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (viii, 1889)                        | 771, 771  |
| Yellow, from Gallic Acid, Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (vi, 1887)                       | 437       |
| Yellow, Orange, and Brown. (P) Nulting and Salis. (iii, 1881)                                                                    | 27        |
| Yellow, Orange, and Brown, Alizarin-like. (P) Shillito. From Geigy. (vii, 1889)                                                  | 702       |
| Yellow, Orange, and Red, Production of. (P) Harmsen. (ii, 1883)                                                                  | 410, 536  |
| Yellow, Orange, Red, and Violet Azo, Production of. (P) Imray. From La Societe Anon. des Matieres Colorantes. (vii, 1888)        | 432       |
| Yellow, Production of:<br>(P) Hahl and Co. (ii, 1883)                                                                            | 243       |
| (P) Erskine. From The Farbenfabriken vormals Bayer and Co. (iv, 1885), 490; (ix, 1890)                                           | 497       |
| (P) Farberwerke vormals Meister, Lucius, and Bruning. (ii, 1883)                                                                 | 403       |
| (P) Forel. (vii, 1888)                                                                                                           | 320, 320  |
| (P) Geigy. (x, 1891)                                                                                                             | 762       |
| (P) Griess. From The Farbenfabriken vormals Bayer and Co. (ix, 1885), 491; (ix, 1890)                                            | 934       |
| (P) Imray. From The Farberwerke vormals Meister, Lucius, and Bruning. (x, 1891)                                                  | 459       |
| (P) Jacobsen. (iii, 1884)                                                                                                        | 28        |
| (P) Levinstein. (viii, 1889), 11; (xiv, 1895)                                                                                    | 567       |
| (P) Machenhauer. (ix, 1885)                                                                                                      | 279       |
| (P) Rudolph. (i, 1882)                                                                                                           | 226       |
| (P) Shillito. From Geigy. (x, 1891)                                                                                              | 132       |
| (P) Wilcox. From The Farbenfabriken vormals Bayer and Co. (ix, 1890)                                                             | 1032      |
| Yellow to Orange, Production of. (P) Shillito. From Feer. (ix, 1890)                                                             | 498       |
| Yellow to Red-Brown, Production of. (P) Imray. From Farberwerke vormals Meister, Lucius, and Bruning. (vii, 1883)                | 1024      |
| Yellowish-Red, Production of. (P) Lake. From Leonhardt and Co. (xi, 1892)                                                        | 516       |
| Colouring Principle of Toddalia Asculata and Evodia Meliifolia. (Perkin and Hummel.) (xiv, 1895)                                 | 476       |
| Colouring Principles in Mang-koudu. (Perkin and Hummel.) (xiii, 1894)                                                            | 940, 1054 |
| Colouring Principles of Ventillaco Madraspatana. (Perkin and Hummel.) (xiv, 1895)                                                | 27        |
| Condensation Products, Employment of Anhydrous Oxalic Acid in Formation of. (Anschutz.) (xi, 1884)                               | 439       |
| Condensation Products of Amines. (P) Newton. From Farbenfabriken vormals Bayer and Co. (xiii, 1894)                              | 801       |
| Congo-Red, Constitution of. (Witt.) (v, 1886)                                                                                    | 449       |
| Cresol-Carboxylic Acid. (Wende.) (v, 1886)                                                                                       | 599       |
| Cresols, Manufacture of. (P) Lake. From Leonhardt and Co. (xi, 1892)                                                             | 28        |
| Croceine Scarlet, &c., Manufacture of. (P) Farbenfabriken vormals Bayer and Co. (ii, 1883)                                       | 172       |
| Cumene Sulphonic Acids, Normal. (Clans and Welzel.) (ix, 1890)                                                                   | 599       |
| Cumidine, A New. (Engel.) (ix, 1885)                                                                                             | 739       |
| Cumidine, Crystallised. (Hofmann.) (ix, 1883)                                                                                    | 241       |
| Cumidine, Manufacture of Solid. (P) Abel. From Actien Gesellschaft fur Anilin Fabrikation. (ii, 1883)                            | 243       |
| Cumidine, Preparing Solid. (P) Actien Gesellschaft fur Anilin Fabrikation. (ii, 1883)                                            | 242       |
| Dehydrothiitolindine. (Jacobsen.) (ix, 1890)                                                                                     | 49        |
| Dehydrothiitolindine, Synthesis of. (Gattermann and Neuberg.) (xi, 1892)                                                         | 673       |
| Derivatives of Azonaphthalene. (Nietzki and Goll.) (v, 1886)                                                                     | 238       |
| Derivatives of Oxazine and Eurlhodine Series. (Lauth.) (xiii, 1894)                                                              | 628       |
| Derivatives of Paramethylsatin. (Zanastovic.) (v, 1886)                                                                          | 237       |
| Derivatives of Phenolphthalein. (Haller and Gnyot.) (xiv, 1895)                                                                  | 360       |
| Diacipiperazines, $\alpha$ , $\beta$ , and Abnormal Reactions in Formation of Piperazines. (Bischoff and Nastvogel.) (vii, 1889) | 978       |
| Diacipiperazines, Production of $\alpha$ , $\gamma$ . (Bischoff and Nastvogel.) (vii, 1889)                                      | 977       |
| Di-alkyl-meth-amido-Cresols, Manufacture of. (P) Lake. From Leonhardt and Co. (xi, 1892)                                         | 28        |
| Diamido Bases, Manufacture of Unsymmetric. (P) Durand, Huguenin, and d'Andiran. (xiii, 1894)                                     | 146       |

COLOURING MATTERS AND DYES, VARIOUS—*cont.*

|                                                                                                                                         |      |
|-----------------------------------------------------------------------------------------------------------------------------------------|------|
| Diamido Compounds and Azo-Colours, Production of. (P) Patl. From Weinberg. (vii, 1888).....                                             | 672  |
| Diamidobenzophenones. (Wichelhaus.) (viii, 1889).....                                                                                   | 536  |
| Diamidocarbazol, Synthesis of a, from Benzidine. (Tauber.) (ix, 1890).....                                                              | 1123 |
| Diamidobenzimidazoles, Manufacture of. (P) Muray, From Farbwärke vorms Meister, Lucius, and Brünig. (xii, 1891).....                    | 941  |
| Diamidophenols, Some Properties of. (Reverdin and de la Harpe.) (xi, 1892).....                                                         | 157  |
| Diamidosulphobenzide and its Derivatives. (Lauth.) (xi, 1892).....                                                                      | 737  |
| Diamidodiphenylmethane, Preparation of. (Mazzara.) (iv, 1885).....                                                                      | 584  |
| Diamines, Action of, on Diacetones. (Coombs.) (viii, 1889).....                                                                         | 976  |
| Diamines and Monamines, Simultaneous Oxidation of. (Bimschodler.) (ii, 1883).....                                                       | 270  |
| Diamidoguanone-amid and Azophenine. (Baudrowski.) (vii, 1888).....                                                                      | 562  |
| Diazines, Hydrated, of the Aromatic Series. (Bischoff.) (vii, 1889).....                                                                | 376  |
| Diazo- and Hydrazine Compounds of the Quinoline Bases. (Böttger.) (x, 1891).....                                                        | 998  |
| Diazo Compound, Manufacture of. (P) Altschul. (xiv, 1895).....                                                                          | 477  |
| Diazo-Compounds, Action of. (Griess.) (i, 1882).....                                                                                    | 414  |
| Diazo Compounds, Action of Alcohol on. (Rensen.) (iv, 1885).....                                                                        | 275  |
| Diazo-Compounds, Action of, on $\beta$ -Naphthylamine. (Lawson.) (iv, 1885).....                                                        | 395  |
| Diazo-Compounds, Action of, on $\beta$ -Naphthylamine, and on $\alpha$ , $\beta$ -Naphthylendiamine. (Lawson.) (v, 1886).....           | 26   |
| Diazo-Compounds and Nitrosamines. (Schraube and Schmidt.) (xii, 1891).....                                                              | 588  |
| Diazo-Compounds in Alkaline Solution, Decomposition of. (Friedlander.) (ix, 1890).....                                                  | 50   |
| Diazo Compounds, Production of. (P) Johnson, From Badische Anilin und Soda Fabrik. (xiii, 1894).....                                    | 1189 |
| Diazo Compounds, Production of Stable. (P) Muray, From The Farbwärke vorms Meister, Lucius, and Brünig. (xiv, 1895).....                | 962  |
| Diazo Compounds, Rate of Decomposition of. (Hansser and Müller.) (xi, 1892).....                                                        | 672  |
| Diazo Compounds, Stability of. (Hirsch.) (x, 1891).....                                                                                 | 535  |
| Diazo Group, Introduction of, into Aromatic Para-Compounds. (Grüss.) (iii, 1884).....                                                   | 517  |
| Diazo-Amido Bodies, Universal Reaction of. (Heumann and Oeconomides.) (vi, 1887).....                                                   | 541  |
| Diazo-Amido Compounds. (Goldschmidt and Molinari.) (vii, 1888).....                                                                     | 672  |
| Diazoamidobenzene. (Fischer.) (iii, 1884).....                                                                                          | 370  |
| Diazoamidobenzene, Action of Phenol on. (Heumann and Oeconomides.) (vi, 1887).....                                                      | 436  |
| Diazoamidobenzoic Acid. (Noelting.) (xi, 1892).....                                                                                     | 343  |
| Diazo benzene-Anilide, Relation of, to Amidoazobenzene. (Friswell and Green.) (ix, 1885).....                                           | 710  |
| Diazo-cumene, Production of, from Solid Cumidine. (P) Abel, From Actien Gesellschaft für Anilin Fabrikation. (ii, 1883).....            | 243  |
| Diazonaphthaliminesulphonic Acid, Colouring Matter from $\alpha$ , (P) Farbenfabriken vorms Bayer and Co. (ii, 1883).....               | 243  |
| Diazo-Salts, Preparation of. (P) Feer. (xiv, 1895).....                                                                                 | 800  |
| Dibromnitrosophenol. (Fischer and Hepp.) (vii, 1888).....                                                                               | 316  |
| Dichloroether, Condensation of, with the Cresols. (Bruckner.) (ix, 1890).....                                                           | 929  |
| Dichloro- $\alpha$ -naphthoquinone Sulphonic Acid. (Claus and Van der Cloet.) (vii, 1888).....                                          | 319  |
| Dichloronaphthalenes, Some Derivatives of 1:2:3. (Clevé.) (ix, 1890).....                                                               | 604  |
| Dichloronaphthalenesulphonic Acid, 1:6:1. (Clevé.) (x, 1891).....                                                                       | 1003 |
| Dichloro- $\alpha$ -substitution Products of Azobenzene-para-sulphonic Acid. (Janovsky.) (ii, 1883).....                                | 373  |
| Dichromes from Phenols. (Brunner and Chuit.) (vii, 1888).....                                                                           | 670  |
| Dichromes, Phenoloxochrome, Thymolochrome and Thymoguinone. (Brunner and Chuit.) (vii, 1888).....                                       | 315  |
| Diethylmercaptol, Manufacture of, and a Sulphonic therefrom. (P) Johnson, From The Farbenfabriken vorms Bayer and Co. (viii, 1889)..... | 610  |
| Dihydroxydimethylanthraquinones, Isomeric. (Kostanek and Niemcewicz.) (v, 1886).....                                                    | 25   |
| Dihydroxynaphthalene, A New. (Claus.) (viii, 1889).....                                                                                 | 535  |
| Dihydroxynaphthalene Sulpho-Acids, Production of. (P) Wilcox, From The Farbenfabriken vorms Bayer and Co. (xii, 1891).....              | 594  |
| Dihydroxyanthrone, A New. (Gräbe and Eichengrün.) (x, 1891).....                                                                        | 536  |
| Dimethylaniline, Action of, in presence of Aluminium Chloride. (Graud.) (viii, 1889).....                                               | 877  |
| Dimethylaniline, Action of Sulphur upon. (Mohlau and Krohn.) (vii, 1888).....                                                           | 203  |
| Dimethylaniline, Carboxyl Derivatives of. (Lauth.) (x, 1891).....                                                                       | 357  |
| Dimethylaniline, Manufacture of. (Schoep.) (xii, 1891).....                                                                             | 244  |
| Dimethylaniline, Nitration of. (Noelting.) (v, 1886).....                                                                               | 376  |
| Dimethylanthraxanthol. (Ehrlich.) (vi, 1887).....                                                                                       | 541  |
| Dimethylortho-anisidine, Nitro Derivatives of. (Grimaux and Lefèvre.) (x, 1891).....                                                    | 692  |
| Dimaphthylamine-Monosulphonic Acids, Production of $\beta$ . (Schiff.) (xii, 1893).....                                                 | 34   |

| Basic, from Alpha-Naphtho-Quinone-Dichloroimide, (P) Johnson. From Badische Anilin und Soda Fabrik. (xi, 1892)..... | 599  |
| Basic, Manufacture of. (P) Johnson. From Badische Anilin und Soda Fabrik. (xi, 1892).....                           | 599  |
| Basic, Production of. (P) Johnson. From Badische Anilin und Soda Fabrik. (xi, 1892), 514; (xii, 1893).....          | 441  |
| Black Polyazo, Production of. (P) Pitt. From Cassella and Co. (xiv, 1895).....                                      | 1001 |
| Blue and Violet, Prod. of. (P) Cassella. (i, 1882).....                                                             | 403  |
| Blue Basic, Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (x, 1891).....                    | 762  |
| Blue or Violet, Production of: (P) Bang. From Dahl. (xiii, 1894).....                                               | 879  |
| (P) Newton. From Farbenfabriken vormals F. Bayer and Co. (xiii, 1894).....                                          | 631  |
| Blue, Production of: (P) Hewitt. From Cassella and Co. (xi, 1892).....                                              | 740  |
| (P) Jefferson. From Dahl. (v, 1886).....                                                                            | 662  |
| (P) Pitt. From Cassella and Co. (xi, 1892).....                                                                     | 514  |
| British Trade in, in 1888. (T.R.) (viii, 1889).....                                                                 | 834  |
| Detection of Adulterations in. (Fairley.) (v, 1886).....                                                            | 286  |
| Detection of, on the Fibre. (Lepetit.) (vii, 1888).....                                                             | 773  |
| Diazo, from Perchlornaphtholdisulpho Acid, Production of. (P) Pitt. From Cassella and Co. (xiv, 1895).....          | 32   |
| Diazo, Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (viii, 1889).....                      | 772  |
| Disazo, Prod. of. (P) Bang. From Dahl. (x, 1891).....                                                               | 131  |
| Disazo, Production of Mixed Blue. (P) Sutton. From Cassella and Co. (xiv, 1895).....                                | 962  |
| Duty on, in France. (Henry.) (i, 1882).....                                                                         | 317  |
| Employment of some Induline. (Ulrich.) (vii, 1888).....                                                             | 39   |
| Fast to Light and Washing, Production of, on Fibres. (P) Pitt. From Cassella and Co. (xiii, 1894).....              | 390  |
| Fast Yellow, Production of. (P) Pitt. From Cassella and Co. (xiv, 1895).....                                        | 963  |
| Fixing of Artificial, by Means of Ferrocyanides. (Reber.) (iv, 1885).....                                           | 342  |
| From Alizarin-Mono-Sulpho-Acid. (P) Wilcox. From The Farbenfabriken vormals Bayer and Co. (viii, 1889).....         | 772  |
| From Amidonaphtholsulpho Acids. (P) Pitt. From Cassella and Co. (xi, 1892).....                                     | 345  |
| From Amidonaphthol-Sulphonic Acids. (P) Pitt. From Cassella and Co. (xii, 1893).....                                | 674  |
| From Anthrol, Dioxanthracene, and their Sulpho Derivatives, Production of. (P) Liebermann. (i, 1882).....           | 226  |
| From Diazosafranines. (P) Pitt. From Cassella and Co. (xiii, 1894).....                                             | 1191 |
| From Naphthol and Naphthylamine Monosulphonic Acids. (P) Pitt. From Cassella and Co. (vi, 1887).....                | 725  |
| From Naphtholdisulphonic Acid, Manufacture of. (P) Pitt. From Cassella and Co. (vi, 1888).....                      | 431  |
| From Natural Mineral Oils, Production of. (P) Frasch. (xii, 1893).....                                              | 756  |
| From Oxethers of Alpha-Naphthylamine and their Sulpho Acids. (P) Pitt. From Cassella and Co. (iv, 1890).....        | 385  |
| From Petroleum, Obtaining. (P) Frasch. (xii, 1893).....                                                             | 756  |
| From Quinones or Phenols, Production of. (P) Geigy. (i, 1882).....                                                  | 404  |
| From Sulpho Acids, Manufacture of. (P) Wilcox. From Farbenfabriken vormals Bayer and Co. (xi, 1892).....            | 399  |
| From Sulphonated Thionines, Production of. (P) Pitt. From Cassella and Co. (x, 1891).....                           | 917  |
| From Tertiary Phenylamines. (P) Actien-Gesellschaft für Anilin Fabrikation. (i, 1882).....                          | 403  |
| German Trade in. (T.R.) (xiii, 1894).....                                                                           | 1114 |
| Imports of, by China. (T.R.) (vi, 1887).....                                                                        | 570  |
| Indigo Blue, Production of. (P) Newton. From Farbenfabriken vormals F. Bayer and Co. (xiv, 1895).....               | 963  |
| Manufacture of: (P) Newton. From Farbenfabriken vormals F. Bayer and Co. (xiv, 1895).....                           | 145  |
| (P) Pitt. From Cassella and Co. (x, 1891).....                                                                      | 252  |
| Manufacture of Teisazo. (P) Pitt. From Cassella and Co. (xiv, 1895).....                                            | 146  |
| Materials for Production of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (x, 1891).....                  | 759  |
| New. (Von Hoernmann.) (i, 1882).....                                                                                | 838  |
| Nitroso-Resorcinol. (Kostanecki.) (vii, 1888).....                                                                  | 838  |
| Of Rosaniline Group, Preparation of. (P) Greiff. (i, 1882).....                                                     | 449  |
| Of the Rosaniline Group, from Paralecaniline. (P) Farbwerke vormals Meister, Lucius, and Brunnig. (i, 1882).....    | 449  |
| Ortho-Hydroxyazo. (Gibell.) (x, 1891).....                                                                          | 830  |
| Poly-Azo, Production of: (P) Newton. From Farbenfabriken vormals F. Bayer and Co. (xiv, 1895).....                  | 265  |
| (P) Pitt. From Cassella and Co. (xiv, 1895).....                                                                    | 478  |
| Production of: (P) Abel. From Actien-Gesellschaft für Anilin Fabrikation. (viii, 1889).....                         | 980  |

|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Magenta, Singular Property of. (i, 1882) .....                                                                                                                                              | 230      |
| Malachite Green. (P) Dittler and Co. (iv, 1885) .....                                                                                                                                       | 203      |
| Mauvesins, Constitution of. (Fischer and Hepp.) (xii, 1883) .....                                                                                                                           | 671      |
| Meldola's Blue, Condensation of, with Amines. (Schlart.) (xi, 1892) .....                                                                                                                   | 25       |
| Meso-anthraniline. (Goldmann.) (ix, 1890) .....                                                                                                                                             | 1027     |
| Meta-Azo-Compound, Note on a. (Meldola and Burls.) (xii, 1893) .....                                                                                                                        | 515      |
| Metadiethylbenzene, Prep. of. (Voswinkel.) (viii, 1889) .....                                                                                                                               | 114      |
| Metadinitro-azoxybenzene, Obtaining. (Klinger and Pitschke.) (iv, 1885) .....                                                                                                               | 741      |
| Metamethylbenzaldehyde, Preparation from. (P) Farberwerke vormals Meister, Lucius, and Brünig. (ii, 1883) .....                                                                             | 243      |
| Meta-methoxy-, Meta-ethoxy, and Meta-benzyloxy-para-amido-benzophenones, Manufacture of Dialkylised. (P) Imray. From The Farberwerke vormals Meister, Lucius, and Brünig. (xii, 1893) ..... | 441      |
| Metamethylbenzaldehydes, Preparing. (P) Farberwerke vormals Meister, Lucius, and Brünig. (i, 1882) .....                                                                                    | 499      |
| Metanitrodimethylamine, Metanitrodithylamine, and Reduction Products. (Groll.) (v, 1886) .....                                                                                              | 319      |
| Metanitroquinoline. (Claus and Stiebel.) (vii, 1888) .....                                                                                                                                  | 32       |
| Metanitrotoluene, Preparation of. (Buchka.) (viii, 1889) .....                                                                                                                              | 388      |
| Metaoxybenzaldehydes, Preparing. (P) Farberwerke vormals Meister, Lucius, and Brünig. (i, 1882) .....                                                                                       | 499      |
| Metaxylene, Nitro and Amido Derivatives of. (Grevink.) (iv, 1885) .....                                                                                                                     | 203, 309 |
| Metaxylenesulphonic Acids. (Moody.) (xi, 1892) .....                                                                                                                                        | 28       |
| Metaxylene, Adjacent. (Jacobsen.) (viii, 1889) .....                                                                                                                                        | 114      |
| Metaxylidine, Adjacent, Identity of, with Orthoxylidine. (Nolling and Beck.) (vii, 1889) .....                                                                                              | 115      |
| Metaxyloquinoline, Derivatives of. (Noelting and Trautmann.) (xi, 1892) .....                                                                                                               | 27       |
| Methoxamido-1:3-dimethylbenzene and its Derivatives. (Hodgkinson and Limpach.) (xi, 1892) .....                                                                                             | 990      |
| Methylamines, Production and Separation of. (P) Vidal. (xi, 1892) .....                                                                                                                     | 344      |
| Methylantracanthol, Formation of. (Cahn.) (v, 1886) .....                                                                                                                                   | 599      |
| Methylantranthraquinone and its Derivatives. (Bornstein.) (i, 1882) .....                                                                                                                   | 400      |
| Methylene Blue. (iii, 1884) .....                                                                                                                                                           | 246      |
| (Bernthsen.) (ii, 1883) .....                                                                                                                                                               | 327      |
| Methylene Blue and Allied Colouring Matters. (Bernthsen.) (iii, 1884) .....                                                                                                                 | 411      |
| Methylene Blue, Constitution of. (Erlenmeyer and Bernthsen.) (iii, 1884) .....                                                                                                              | 251      |
| Methylene-Blue Group, Studies in the. (viii, 1889) .....                                                                                                                                    | 452      |
| Methylene Blue, Manufacture of a. (P) Imray. From The Farberwerke vorm. Meister, Lucius, and Brünig. (vii, 1888) .....                                                                      | 206      |
| Methylglyoxalidine, Production of. (P) Imray. From Farberwerke vormals Meister, Lucius, and Brünig. (xiv, 1895) .....                                                                       | 651      |
| Methyl-para-toluidine. (Bamberger and Wulz.) (x, 1891) .....                                                                                                                                | 1000     |
| Methylquinoline, Preparation of: (P) Farberwerke vorm. Meister, Lucius, and Brünig. (ii, 1883) .....                                                                                        | 243      |
| (P) Rudolph. (ii, 1883) .....                                                                                                                                                               | 40       |
| Methyltriphenylmethane Carboxylic Acid. (vi, 1887) .....                                                                                                                                    | 213      |
| Methylviolet, Manufacture of. (Mühlhauser.) (vi, 1887) .....                                                                                                                                | 494      |
| Mono- and Dinitronaphthoresorcinol. (Kostanecki.) (viii, 1889) .....                                                                                                                        | 607      |
| Mono- and Ditylosamine, Production of. (Levi.) (vi, 1887) .....                                                                                                                             | 505      |
| Mono-acetylrazines. (Bischoff and Nastvogel.) (viii, 1889) .....                                                                                                                            | 977      |
| Monoethylozane. (Bernthsen and Goske.) (vii, 1887) .....                                                                                                                                    | 506      |
| Mono-iodo-Phenols. (Noelting and Stricker.) (vii, 1888) .....                                                                                                                               | 562      |
| Monomethylorange. (Bernthsen and Goske.) (vi, 1887) .....                                                                                                                                   | 506      |
| Mononitroanisole and Mononitrophenol, Preparation of. (Wilgrod and Ferks.) (v, 1886) .....                                                                                                  | 161      |
| Mononitroresorcinol. (Fevre.) (ii, 1883) .....                                                                                                                                              | 270, 374 |
| Mono-oxanthones, Constitution of the. (Dreher and Kostanecki.) (xii, 1893) .....                                                                                                            | 440      |
| Monosulpho Acid of $\alpha$ -Naphthol. (P) Liebmann and Stüder. (vii, 1888) .....                                                                                                           | 431      |
| Monosulpho Acid, Separation of $\alpha$ , of $\beta$ -Naphthol. (P) Hadan. From Farbenfabriken vormals Bayer and Co. (iv, 1885) .....                                                       | 452      |
| Monosulphonic Acids, Preparation of. (P) Badische Anilin und Soda Fabrik. (ii, 1883) .....                                                                                                  | 275      |
| Morindon. (Thorpe and Smith.) (vii, 1888) .....                                                                                                                                             | 382      |
| Naphthalene, Substituted Amidophenols. (Ulzer and Holler.) (xiii, 1894) .....                                                                                                               | 799      |
| Naphthalene Derivatives. (Witt.) (vii, 1888) .....                                                                                                                                          | 317      |
| Naphthalene Derivatives, Sulphonation of. (Dressel and Kothe.) (xiii, 1894) .....                                                                                                           | 875      |
| Naphthalene Indigo, $\alpha$ - and $\beta$ -. (Wichelhaus.) (xiii, 1894) .....                                                                                                              | 29       |
| Naphthalene, Ortho-, Para-, and Peri-Disulphonic Derivatives of. (Armstrong and Wynne.) (xii, 1893) .....                                                                                   | 592      |
| Naphthalene- $\alpha$ -monosulpho Acid, Manufacture of $\alpha$ , $\beta$ -Dihydroxy. (P) Newton. From The Farbenfabriken vormals Bayer and Co. (xiv, 1895) .....                           | 31       |
| Naphthalene-1:2'-Disulphonic Acid. (Armstrong and Wynne.) (ix, 1890) .....                                                                                                                  | 799      |
| Naphthalenedisulphonic Acid, $\alpha$ -amido-1:3'. (Armstrong and Wynne.) (ix, 1890) .....                                                                                                  | 283      |

COLOURING MATTERS AND DYES, VARIOUS—*cont.*

|                                                                                                                                                         |          |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Naphthalene-metadisulphonic Acid. (Armstrong and Wynne.) (ix, 1890) .....                                                                               | 283      |
| Naphthalene-metadisulphonic Acid, Action of Potash on. (Armstrong and Wynne.) (ix, 1890) .....                                                          | 603      |
| Naphthalene-sulpho Acids, Production of. (P) Wilcox. From Farbenfabriken vormals Bayer and Co. (xii, 1893) .....                                        | 505      |
| Naphthoquinone, Action of Hypochlorous Acid on $\beta$ -. (Bamberger and Kitschelt.) (xi, 1892) .....                                                   | 997      |
| Naphthoquinone Sulphonic Acids, $\beta$ -. (Witt.) (xi, 1892) .....                                                                                     | 155      |
| Naphthazarin. (Zincke and Schmidt.) (xiv, 1895) .....                                                                                                   | 650      |
| Naphthidine, Preparation of. (Reverdin and de la Harpe.) (xii, 1893) .....                                                                              | 822      |
| Naphthidine Acid, Nitration of. (Nietzki and Zubelew.) (viii, 1889) .....                                                                               | 386      |
| Naphtholaldehyde, $\beta$ -. (Bamberger and Bolkmann.) (vi, 1887) .....                                                                                 | 542      |
| Naphthol, Action of Nitrous Acid on 1- $\alpha$ -amido-2- $\beta$ -. (Meldola.) (xii, 1893) .....                                                       | 141      |
| Naphthol, $\alpha$ , of the Thiophen Group. (Biedermann.) (v, 1886) .....                                                                               | 481      |
| Naphthol, Azo Colours from Trisulphonic Acids of $\beta$ -. (P) Farberwerke vormals Meister, Lucius, and Brünig. (ii, 1883) .....                       | 243      |
| Naphthol Carbonic Alkaline Salts, Manufacture of. (P) Kolbe and Reutsch. (iv, 1885) .....                                                               | 531      |
| Naphthol Derivatives, Action of Nitric Acid on. (Armstrong and Kossiter.) (x, 1891) .....                                                               | 693      |
| Naphthol, Derivatives of $\alpha$ - and $\beta$ -. (Friedländer.) (iii, 1884) .....                                                                     | 163      |
| (Reverdin and de la Harpe.) (xi, 1892) .....                                                                                                            | 997, 998 |
| Naphthol, Manufacture of Alpha- and Beta-. (P) Levinstein. (iii, 1884) .....                                                                            | 29       |
| Naphthol, Manufacture of Higher Homologues of. (P) Liebmann. (i, 1882) .....                                                                            | 102      |
| Naphthol, Oxidation of $\beta$ -. (Ehrlich.) (viii, 1889) .....                                                                                         | 456      |
| Naphthol Yellow, Constitution of. (Armstrong and Wynne.) (ix, 1890) .....                                                                               | 284      |
| Naphthol Yellow S, Properties of. (Lauterbach.) (i, 1882) .....                                                                                         | 63       |
| Naphthols, Converting into their Corresponding Monamines. (P) Badische Anilin und Soda Fabrik. (i, 1882) .....                                          | 105      |
| Naphthol- $\alpha$ , $\beta$ -Disulpho Acid, Manufacture of $\beta$ -. (P) Newton. From The Farbenfabriken vormals Bayer and Co. (xiv, 1895) .....      | 31       |
| Naphthol- $\alpha$ -monosulphonic Acid, Colouring Matter from $\beta$ -. (P) Bayer and Co. (ii, 1883) .....                                             | 243      |
| Naphthol- $\alpha$ -Sulphonic Acid, $\alpha$ -. (Witt and Kaufmann.) (xi, 1882) .....                                                                   | 155      |
| Naphtholbidiazobenzene, $\alpha$ , and $\alpha$ -Naphthylaminebidiazobenzene. (Krohn.) (viii, 1889) .....                                               | 116      |
| Naphtholdisulphonic Acid and $\alpha$ -Naphtholtrisulphonic Acid, $\alpha$ -. (Claus and Melcke.) (v, 1886) .....                                       | 378      |
| Naphtholdisulphonic Acid, Prep. of a New. (viii, 1889) .....                                                                                            | 278      |
| Naphtholdisulphonic Acids, Manufacture of $\alpha$ -. (P) Imray. From The Farberwerke vormals Meister, Lucius, and Brünig. (xiv, 1895) .....            | 650      |
| Naphtholdisulphonic Acids, Producing, and Separating Colouring Matters from. (P) Wetter. From Leipziger Anilin Fabrik. (iv, 1885) .....                 | 339      |
| Naphthol-green, Mannf. of. (P) Gans and Co. (iv, 1885) .....                                                                                            | 204      |
| Naphtholmonosulphonic Acid, Manufacture of $\alpha$ -. (P) Imray. From The Farberwerke vormals Meister, Lucius, and Brünig. (xiv, 1895) .....           | 650      |
| Naphtholsulphamidosulphonic Acids, $\alpha$ -. (Bernthsen.) (ix, 1890) .....                                                                            | 1121     |
| Naphtholsulphide, Manufacture of $\beta$ -. (Onufrowicz.) (viii, 1889) .....                                                                            | 187      |
| Naphtholsulphonic Acids and Naphthol Sulfones. (Nietzki.) (x, 1891) .....                                                                               | 537      |
| Naphtholsulphonic Acids, Manufacture of. (Brönner and Co.) (iv, 1885) .....                                                                             | 50       |
| Naphtholsulphonic Acids, Manufacture of Alpha-. (P) Abt. From Farberwerke vormals Meister, Lucius, and Brünig. (xii, 1893) .....                        | 672      |
| (Bender.) (vii, 1889) .....                                                                                                                             | 609      |
| Naphtholsulfonesulphonic Acids. (Bernthsen.) (ix, 1890) .....                                                                                           | 1121     |
| Naphthoquinone, Derivatives of Nitro- $\beta$ -. (Zartling.) (ix, 1890) .....                                                                           | 492      |
| Naphthoquinonemethyloro-imide. (Friedländer and Bockmann.) (ix, 1890) .....                                                                             | 50       |
| Naphthyl Red and Magdala Red. (Fischer and Hepp.) (xii, 1894) .....                                                                                     | 29       |
| Naphthylamine, $\alpha$ , $\beta$ -Disulpho Acid, Manufacture of $\beta$ -. (P) Newton. From The Farbenfabriken vormals Bayer and Co. (xiv, 1895) ..... | 31       |
| Naphthylamine Compounds, Preparation of. (Landshoff.) (iv, 1885) .....                                                                                  | 202      |
| Naphthylamine, Manufacture of $\alpha$ -. (Witt.) (vi, 1887) .....                                                                                      | 504      |
| Naphthylamine, Manufacture of Monosulphonic Acids of $\beta$ -. (P) Elsasser. (iv, 1885) .....                                                          | 52       |
| Naphthylamine, Mono-sulphonic Acid of $\beta$ -. (Bayer and Dmsberger.) (vi, 1887) .....                                                                | 593      |
| Naphthylamine, Nitration of $\beta$ -. (Friedländer and Szymanski.) (xi, 1892) .....                                                                    | 998      |
| Naphthylamine, Preparation of $\alpha$ , and $\alpha$ -Naphthol- $\epsilon$ -Disulphonic Acid. (Bernthsen.) (ix, 1890) .....                            | 491      |
| Naphthylamine, Sulphonation of $\alpha$ -. (Manzelius.) (vii, 1888) .....                                                                               | 118      |
| Naphthylamine, Sulphonation of, with Acid Potassium Sulphate. (Bischoff.) (ix, 1890) .....                                                              | 932      |

| Naphthylaminesulphonic Acid, Preparation of $\beta$ - and of $\beta$ -Naphthylamine, and of Salts of $\beta$ -Naphthylamine Acid. (P) Tobias. (xiii, 1894) | 800  |
| Naphthylaminesulphonic Acids. (Schultz.) (vii, 1888)                                                                                                       | 33   |
| Naphthylaminesulphonic Acids, Isomeric $\alpha$ - (Witt.) (v, 1886)                                                                                        | 164  |
| Naphthylaminesulphonic Acids, Two $\beta$ - (Forsling.) (vi, 1887)                                                                                         | 721  |
| Naphthylaminetrisulphonic Acid, Manufacture of. (P) Abel. From Fischesser and Co. (xiv, 1895)                                                              | 266  |
| Naphthylaminetrisulphonic Acid, Preparation of $\alpha$ - (P) Farbwerke vormals Meister, Lucius, und Brünig. (ii, 1883)                                    | 536  |
| Naphthylenediamine, $m(\alpha\beta)$ . (Urban.) (vi, 1887)                                                                                                 | 512  |
| Naphthylenediamine, 1:1' or 1,8. (Hinsberg.) (viii, 1890)                                                                                                  | 388  |
| Naphthylenediamine, 2-3-. (Friedlander and Zakrzewski.) (xiii, 1894)                                                                                       | 721  |
| Naphthylenediamines. (Ewer and Pick.) (viii, 1889)                                                                                                         | 278  |
| Naphthylenediamines and their Formation. (Lange.) (vii, 1888)                                                                                              | 618  |
| Naphthylenediamine-mono-sulpho Acid, Production of. (Dawson and Hirsch.) (x, 1891)                                                                         | 539  |
| Naphthylenediaminesulpho Acids, Manufacture of. (P) Abel. From Fischesser and Co. (xiv, 1895)                                                              | 479  |
| Naphthylsulphate Soda Salt. (Stebbins.) (i, 1882)                                                                                                          | 182  |
| Nitriline, Prep. of $\alpha$ - and $\beta$ - (Meyer and Riz.) (v, 1886)                                                                                    | 450  |
| Nitration of Benzene. (Meyer.) (viii, 1889)                                                                                                                | 275  |
| Nitration under varying conditions. (Noelting and Collin.) (iv, 1885)                                                                                      | 399  |
| Nitric Acid, Action of Fuming, on Camphor Monochloride. (Cazenave.) (ii, 1883)                                                                             | 371  |
| Nitric Acid, Action of, on Dimethylortho-Anisidine. (Van Romburgh.) (xi, 1892)                                                                             | 155  |
| Nitro- and Amido Derivatives of Paradiethylamine. (Jaubert.) (xiv, 1895)                                                                                   | 860  |
| Nitro Compounds, Constitution of Coloured. (Armstrong.) (xi, 1892)                                                                                         | 512  |
| Nitro Compounds, Reduction of. (Wohl.) (xiii, 1894)                                                                                                        | 876  |
| Nitroalizarin, Preparing. (Sitton.) (i, 1882)                                                                                                              | 224  |
| Nitronthraquinone, A New. (Roemer.) (i, 1882)                                                                                                              | 400  |
| Nitro-azo Compounds and Azo-nitrolic Acids, Products of. (Janovsky.) (iv, 1885)                                                                            | 691  |
| Nitro-azo Compounds, Intermediate Products of Reduction of. (Janovsky and Ehrh.) (iv, 1885)                                                                | 397  |
| Nitro-Benzaldehyde, Products of $m$ , with Phenol, &c. (Yarda and Zenoni.) (x, 1891)                                                                       | 830  |
| Nitro- $\beta$ -Naphthoquinone, Preparation of. (Zineke.) (xii, 1893)                                                                                      | 35   |
| Nitrofluorescein, Manufacture of. (Mühlhäuser.) (xi, 1892)                                                                                                 | 739  |
| Nitro-Cresols, Production of. (Staedel.) (ii, 1883)                                                                                                        | 316  |
| Nitro-Derivatives of Alizarin and Purpurin. (Brach.) (x, 1891)                                                                                             | 828  |
| Nitro-Derivatives of Phenolphthalein. (Hall.) (xii, 1893)                                                                                                  | 141  |
| Nitro-Derivatives, Preparation of. (Armstrong and Rossiter.) (x, 1891)                                                                                     | 634  |
| Nitrohydroxy- and Nitro-amido-azo Compounds. (Taubert.) (xiii, 1894)                                                                                       | 28   |
| Nitro-ketone Derived from Camphosulphophenols. (Cazenave.) (xi, 1892)                                                                                      | 512  |
| Nitro-leuco Bases of Triphenylmethane, Preparation of. (P) Farbwerke vormals Meister, Lucius, und Brünig. (iii, 1884)                                      | 105  |
| Nitromethoxybenzaldehydes, Isomeric. (Tiemann and Ludwig.) (ii, 1883)                                                                                      | 268  |
| Nitronaphthalene, $\alpha$ -, Action of Sulphuric Acid on. (Palmaer.) (viii, 1889)                                                                         | 116  |
| Nitronaphthalene, Preparation of $\beta$ -. (Lellmann.) (vi, 1887)                                                                                         | 541  |
| Nitronaphthalenesulphonic Acid, 1:4. (Cleve.) (ix, 1890)                                                                                                   | 604  |
| Nitro-orthotolidine and its Derivatives. (Noelting and Collin.) (iv, 1885)                                                                                 | 399  |
| Nitro- $p$ -amidophenol, Prod. of $p$ -. (Hähle.) (x, 1891)                                                                                                | 691  |
| Nitrophenylacetone, Preparation of. (Edler.) (iv, 1885)                                                                                                    | 338  |
| Nitrosamines and Nitroso-Bases. (Fischer and Hepp.) (vi, 1887)                                                                                             | 723  |
| Nitrosamines, Manufacture of. (P) Johnson. From Badische Anilin und Soda Fabrik. (xiv, 1895)                                                               | 567  |
| Nitroso- $\alpha$ -naphthol-disulphonic Acid, Preparation of. (P) Seltzer. (vi, 1882, 226; (ii, 1883)                                                      | 243  |
| Nitroso-Bases, Action of, on Phenylhydrazine. (Fischer and Wacker.) (viii, 1889)                                                                           | 387  |

COLOURING MATTERS AND DYES, VARIOUS—*cont.*

|                                                                                                                                         |      |

| Nitrosobenzylamine and Toluidine, Study of $p$ -. (Boedinghaus.) (x, 1891)                                                              | 829  |
| Nitrosodimethylamine, Action of Acid Chlorides on. (Ehrlich and Collin.) (xiii, 1891)                                                   | 30   |
| Nitrosohydroquinolones, Tinctorial Properties of the. (Kostanecki.) (x, 1891)                                                           | 356  |
| Nitrosanaphthols, Compounds of, with Iron and Cobalt. (Hoffmann.) (iv, 1885)                                                            | 278  |
| Nitrosanaphthols, Preparation of. (Henriques and Umski.) (iv, 1885)                                                                     | 338  |
| Nitrosanaphtholsulphonic Acids, Compounds of, with Cobalt and Iron. (Hoffmann.) (iv, 1885)                                              | 278  |
| Nitroso-ortho-cresol. (Noelting and Kohl.) (iii, 1884)                                                                                  | 245  |
| Nitrosophenols. (Goldschmidt.) (iii, 1884)                                                                                              | 247  |
| Nitrotoluic Acid. (Noelting.) (xi, 1892)                                                                                                | 344  |
| Nitrotoluidine from Liquid Dimethylolene: (Bernthsen.) (ii, 1883)                                                                       | 169  |
| (Ulman.) (iv, 1885)                                                                                                                     | 114  |
| Nitrotoluidine Sulphonic Acids. (Nietzki and Pollm.) (ix, 1890)                                                                         | 492  |
| Nitrous Acid, Action of, on Tetramethylamidobenzophenone. (Herzberg and Polonowsky.) (xi, 1892)                                         | 156  |
| Noir-bleu, Manuf. of, from Indigo. (P) Clark. (i, 1882)                                                                                 | 107  |
| Octahydro- $\alpha$ -naphthoquinoline. (Bamberger and Stettenheimer.) (xi, 1892)                                                        | 24   |
| Opianrin. (Liebemann and Seidler.) (vi, 1887)                                                                                           | 541  |
| Orcin Derivatives. (Zulkowski and Peters.) (ix, 1890)                                                                                   | 1123 |
| Orcine, Artificial, Preparation of, from Toluene and its Derivatives. (P) Neville. (i, 1882)                                            | 227  |
| Orcin and other Dioxynolins. (Neville and Wintner.) (ii, 1883)                                                                          | 167  |
| Orcin, Conversion of Toluenediamine into $\gamma$ -. (Wallach.) (ii, 1883)                                                              | 39   |
| Orcinol and Resorcinol Colours. (Nietzki and Mackler.) (ix, 1890)                                                                       | 600  |
| Orcinol from Acetone Dicarboxylic-ether. (Cornelius and Von Pechmann.) (v, 1886)                                                        | 481  |
| Orcinol, Methylation of Symmetrical. (Kraus.) (x, 1891)                                                                                 | 914  |
| Orcinol, Preparation of. (Wintner.) (ii, 1883)                                                                                          | 268  |
| Orcinol, Synthesis of $\beta$ -. (Kostanecki.) (v, 1886)                                                                                | 539  |
| Orthamido-azo Compounds: (Noelting and Witt.) (iii, 1884)                                                                               | 248  |
| (Wicker.) (v, 1886)                                                                                                                     | 29   |
| Ortho- and Para-oxy-orthotoluic Acids and Meta-cresol, Manufacture of. (P) Johnson. From Kalle and Co. (xiv, 1895)                      | 800  |
| Orthoamidobenzaldehyde. (Gadmel.) (i, 1882)                                                                                             | 400  |
| Orthocinnamic carboxylic Acid, Oxidation of $\beta$ -naphthol to. (Ehrlich and Benedikt.) (vii, 1888)                                   | 671  |
| Ortho-cresol-benzene. (Schroter.) (ix, 1890)                                                                                            | 437  |
| Ortho-cresol-sulphonic Acid. (Hantke.) (vii, 1888)                                                                                      | 32   |
| Orthodiamines and $\alpha$ -Amido-phenols, Oxidation Products of. (Fischer and Hepp.) (ix, 1890)                                        | 1028 |
| Orthodiamines, Oxidation Products of. (Fischer and Hepp.) (xii, 1893)                                                                   | 751  |
| Ortho-hydroxyazo Compounds, Constitution of. (Gadmel and Kostanecki.) (xi, 1892)                                                        | 925  |
| Ortho-hydroxyazo Derivatives of $\alpha$ -Naphthol. (Noelting and Grandmougin.) (x, 1891)                                               | 756  |
| Ortho-Methylbenzidine, Prep. of. (Hirsch.) (x, 1891)                                                                                    | 40   |
| Orthonitraniline, Manufacture of. (Pokorny.) (xiv, 1895)                                                                                | 25   |
| Orthonitranilinesulphonic Acid and its Derivatives. (Nietzki and Lerch.) (viii, 1889)                                                   | 116  |
| Orthonitranilinesulphonic Acid and Orthonitraniline. (Nietzki and Benckiser.) (iv, 1885)                                                | 276  |
| Orthonitrobenzaldehyde, Action of, on Aldehyde. (Baeyer and Drewsen.) (iii, 1884)                                                       | 27   |
| Orthonitrobenzaldehyde, Prep. of. (Einhorn.) (iii, 1884)                                                                                | 251  |
| Orthonitrobenzylchloride. (Noelting.) (iii, 1884)                                                                                       | 244  |
| Orthonitrobenzylchloride, Production of Derivatives of. (P) Fischer. (viii, 1889)                                                       | 772  |
| Orthonitrobenzylideneacetone, Preparation of Methylquinoline from. (P) Farbwerke vormals Meister, Lucius, und Brünig. (ii, 1883)        | 243  |
| Orthonitrodiphenylamine and its Derivatives. (Schopp.) (ix, 1890)                                                                       | 581  |
| Orthonitrometamethylbenzaldehyde, Preparation of. (P) Farbwerke vormals Meister, Lucius, und Brünig. (ii, 1883)                         | 243  |
| Orthonitro oxyphenylacetic Acid, Behaviour of, with Reducing Agents. (Thate.) (i, 1882)                                                 | 222  |
| Orthonitrotoluene. (Steng.) (x, 1891)                                                                                                   | 916  |
| Ortho-oxylphenylcarbon Acid, Production of. (P) Wilcox. From von Heyden. (xi, 1892)                                                     | 344  |
| Orthoquinolmethyldiazine, Prod. of. (Dufrenoy.) (x, 1891)                                                                               | 398  |
| Orthotolidine and Paratolidine, Estimation of, by means of Specific Gravity. (Lunze.) (iv, 1885)                                        | 339  |
| Orthotolidine, Reactions of. (Schiff and Ostrogovich.) (xiii, 1894)                                                                     | 797  |
| Orthotolidine, Separating Paratolidine from. (P) Lewy. (ii, 1883)                                                                       | 242  |
| Orthotolidine, Separation of, from Paratolidine and Aniline. (P) Weiler. (ii, 1883)                                                     | 475  |
| Orthoxylidine, Constitution of 1,2,4. (Jacobsen.) (iii, 1884)                                                                           | 250  |
| Orthoxylidine, 1:2:3, Production of. (Meuton.) (x, 1891)                                                                                | 830  |

COLOURING MATTERS AND DYES, VARIOUS—*cont.*

|                                                                                                                                         |          |

| Oxalic Acid, Compounds of, with $\alpha$ - and $\beta$ -Naphthol. (Staub and Smith.) (iii, 1884).....                                   | 442      |
| Oxazines and Earhodines, Derivatives of. (Lauth.) (xiv, 1895).....                                                                      | 25       |
| Oxidation Compounds of Amidonaphthol Sulphonic Acids. (Reverdin and de la Harpe.) (xi, 1892).....                                       | 397      |
| Oxyanthraquinone, Production of. (P) Imray. From Farberwerke vormals Meister, Lucius, and Bruning. (xin, 1891).....                     | 878      |
| Oxyanthraquinone, Production of $\alpha$ -. (P) Imray. From Farberwerke vormals Meister, Lucius, and Bruning. (xiv, 1895).....          | 263      |
| Oxyanthraquinones, Chromogenic Properties of. (Liebermann and Kostanecki.) (vi, 1887).....                                              | 724, 818 |
| Oxyazo Compounds. (Meyer and Kreis.) (ii, 1883).....                                                                                    | 376      |
| Oxyazo Compounds, Formation of. (Fischer and Wimmer.) (vi, 1887).....                                                                   | 659      |
| Oxymethoxybenzoic Acids, Production of. (P) von Heyden Nachfolger. (ix, 1890).....                                                      | 384      |
| Oxypyrazols, Manufacture of. (P) Abel. From Farberwerke vormals Meister, Lucius, and Bruning. (iii, 1884).....                          | 568      |
| Oxyquinoline, Preparation of. (P) Skrap. (i, 1882).....                                                                                 | 21       |
| Oxyquinoline-phenol-sulphonic-oxyquinoline, Production of. (P) Lembach and Wolff. (xii, 1893).....                                      | 258      |
| Oxysulphonic Acids of Naphthalene, Production of. (P) Imray. From The Farberwerke vormals Meister, Lucius, and Bruning. (ix, 1890)..... | 609      |
| Oxyxanthones, Synthesis of. (Kostanecki and Nessler.) (ix, 1891).....                                                                   | 915      |
| Paraloceruleine, Transforming into Dye-stuffs of Rosamine Group. (P) Farberwerke vormals Meister, Lucius, and Bruning. (i, 1882).....   | 449      |
| Paramagenta, Production of. (P) Imray. From The Farberwerke vormals Meister, Lucius, and Bruning. (xii, 1893).....                      | 1024     |
| Paramidocarbonyls, Formation of. (Fischer.) (x, 1891).....                                                                              | 535      |
| Paramidoditetrhydro $\alpha$ -naphthaquinoline. (Bamberger and Stettenheimer.) (xi, 1892).....                                          | 24       |
| Paramidodiphenylcarbinol. (Baeyer and Lohr.) (ix, 1890).....                                                                            | 381      |
| Paramitrobenzaldehyde and Acetone. (Baeyer and Becker.) (iii, 1884).....                                                                | 26       |
| Paramitrobenzaldehyde, Prep. of. (P) Baeyer. (i, 1882).....                                                                             | 24       |
| Paramitrobenzylidene Chloride, Preparation of. (P) Farberwerke vormals Meister, Lucius, and Bruning. (iii, 1884).....                   | 104      |
| Paramitrocinnamaldehyde, Formation of Ortho- and. (Dichl and Emhorn.) (iv, 1885).....                                                   | 710      |
| Paramitrometa-amidobenzene Sulphonic Acid and "Fast Yellow." (Eger.) (vii, 1889).....                                                   | 388      |
| Paramitro-ortho-toluene Sulphonic Acid. (Hausser.) (ix, 1890).....                                                                      | 798      |
| Paramitroso-aniline, Production of. (Fischer and Hepp.) (vii, 1888).....                                                                | 316      |
| Paramitrosodiphenylamine. (Kita.) (vii, 1888).....                                                                                      | 318      |
| Paramitrotoluidene, Action of Alkali on. (Fischer and Hepp.) (xiii, 1894).....                                                          | 29       |
| Paraphenylene Blue. (viii, 1889).....                                                                                                   | 180      |
| Pararosaniline and its Salts. (Miolati.) (xiii, 1894).....                                                                              | 143      |
| Pararosaniline, Production of. (P) Baum. (vi, 1887).....                                                                                | 437      |
| Pararosaniline, Synthesis of. (Zimmermann and Muller.) (iv, 1885).....                                                                  | 395      |
| Paratoluidine, Action of on Resorcinol and Quinol. (Hatschek and Zera.) (v, 1886).....                                                  | 161      |
| Paratoluidine, Oxidation of. (Green.) (xiii, 1894).....                                                                                 | 143      |
| Paratoluidine, Separating Orthotoluidine from. (P) Levy. (ii, 1889).....                                                                | 242      |
| Paraxylidine, Crystallisation of. (Michael.) (xii, 1893).....                                                                           | 319      |
| Paraxylidine, Preparation and Properties of. (Witt, Noeltling, and Forst.) (iv, 1885), 711; (viii, 1889).....                           | 274      |
| Paraxylquinoline, Derivatives of. (Noeltling and Fruchling.) (viii, 1889).....                                                          | 187      |
| Penta- and Tetra-Ethylbenzene. (Jacobsen.) (viii, 1889).....                                                                            | 113      |
| Pentamethylamidobenzene, Preparation of. (Hofmann.) (iv, 1885).....                                                                     | 672      |
| Perechloromethylmercaptan, Formation of Methyl-violet with. (Rathke.) (v, 1886).....                                                    | 320      |
| Phenazine. (Bernthsen.) (v, 1886).....                                                                                                  | 661      |
| Phenazine, Chromogenic Character of. (Bernthsen.) (v, 1886).....                                                                        | 661      |
| Phenazine, Pyroelectric Formation of. (Bernthsen.) (vi, 1887).....                                                                      | 285      |
| Phenazines, Synthesis of. (Eicker.) (x, 1891).....                                                                                      | 355      |
| Phenazoxin, a New Chromogenic Body. (Bernthsen.) (vi, 1887).....                                                                        | 542      |
| Phenol Ether and Oxidiphenyl, Manufacture of. (P) Dawson and Hirsch. (x, 1891).....                                                     | 538      |
| Phenol, Manufacture of Higher Homologues of. (P) Liebmman. (i, 1882).....                                                               | 102      |
| Phenols and Acetic Acid, Condensation Products of. (Rasinski.) (ii, 1883).....                                                          | 169      |
| Phenols, Compounds of Phthalic Acid with. (Baeyer.) (i, 1882).....                                                                      | 446      |
| Phenols, Compounds of, with Amido-Bases. (Dale and Schorlemmer.) (ii, 1883).....                                                        | 268      |
| Phenols, Conversion of, into Anines. (Bueh.) (iv, 1885).....                                                                            | 276      |
| Phenols, Naphthols, and Resorcin, Preparation of. (P) Actien Gesellschaft fur Anilin Fabrikation. (i, 1882).....                        | 226      |
| Phenols of Fluorene and Acenaphthene, Production of. (P) Holliday and Hodgkinson. (iii, 1884).....                                      | 319      |
| Phenolphthalen and Fluorescein Derivatives. (Holler and Guyot.) (xii, 1893).....                                                        | 823      |
| Phenosafranines, Constitution of. (Barbier and Vignon.) (vii, 1888).....                                                                | 31       |

COLOURING MATTERS AND DYES, VARIOUS—*cont.*

|                                                                                                                            |                          |
|----------------------------------------------------------------------------------------------------------------------------|--------------------------|
| Phenylacetylene, Artificial Indigo from. (P) Badische Anilin und Soda Fabrik. (ii, 1883).....                              | 243                      |
| Phenylamidoazobenzene Sulphonic Acids, Production of. (P) Dahl and Co. (ii, 1883).....                                     | 243                      |
| Phenylamines, Production and Separation of. (P) Vidal. (xi, 1892).....                                                     | 314                      |
| Phenylazotetrhydro $\alpha$ -naphthaquinoline. (Bamberger and Stettenheimer.) (xi, 1892).....                              | 23                       |
| Phenylisazoresorcinols, Isomeric. (Kostanecki.) (vii, 1888).....                                                           | 838                      |
| Phenylenediamine, $\beta$ -dinaphthyl- $p$ -. (Ruoff.) (viii, 1889).....                                                   | 452                      |
| Phenylenediamine, Oxidation of $\alpha$ -. (Fischer and Hepp.) (ix, 1890).....                                             | 602                      |
| Phenylhydrazine and Hydroxylamine, Reactions of. (Fischer.) (ix, 1890).....                                                | 50                       |
| Phenylhydrazine, Treatment of, with a New Ethylether. (P) Imray. From Society of Chemical Industry, Basle. (vi, 1887)..... | 726                      |
| Phenylindole, On Pr. 3. (Fischer and Schmidt.) (vii, 1888).....                                                            | 559                      |
| Phenylmethane, Coloured and Colourless Derivatives of Di- and Tri-. (Rosenstiel.) (xiii, 1894).....                        | 798                      |
| Phenyl-Ortho-Oxalate. (Claparede and Smith.) (ii, 1883).....                                                               | 345                      |
| Phthalic Acids, Constitution of. (Meyer.) (x, 1891).....                                                                   | 827                      |
| Phthalic Acid, Preparation of: (Fuchs.) (x, 1891).....                                                                     | 758                      |
| (Laudens.) (x, 1891).....                                                                                                  | 758                      |
| Phthalic Anhydride, Action of, on Quinoline. (Traub.) (ii, 1883).....                                                      | 274                      |
| Phthalides, Discovery of. (Perkin.) (iv, 1885).....                                                                        | 434                      |
| Phthalylchloride, Constitution of. (Meyer.) (iii, 1884).....                                                               | 370                      |
| Picric Acid, Manufacture of. (P) Eisenmann and Arche. (ix, 1890).....                                                      | 385                      |
| Picric Acid, Production of, from Crude Phenols. (P) Thompson. From De Lom de Berg. (ix, 1890).....                         | 1032                     |
| Picrocarmine, Production of. (Gedost.) (vi, 1887).....                                                                     | 513                      |
| Piperidine Bases. (Lellman and Buttner.) (ix, 1890).....                                                                   | 950                      |
| Ponceau Red of Japan. (Scheurer.) (xii, 1893).....                                                                         | 752                      |
| Primuline and Allied Sulphur Compounds, Constitution of. (Green.) (viii, 1889).....                                        | 383                      |
| Primuline and Inuran Red. (Kertesz.) (vii, 1888).....                                                                      | 561                      |
| Primuline, Constitution of. (Plitzing and Gattermann.) (viii, 1889).....                                                   | 608                      |
| Printing Ink, Manufacture of. (P) Bibby. (xiii, 1894).....                                                                 | 145                      |
| Prussian Blue, New. (Guignet.) (viii, 1889).....                                                                           | 277                      |
| Prussian Blue, Prep. of Soluble. (Demandre.) (i, 1882).....                                                                | 254                      |
| Pseudocoumarine. (Haller.) (iv, 1885).....                                                                                 | 378                      |
| Pseudocoumidine and Pseudocoumenol, Preparation of. (Edler.) (iv, 1885).....                                               | 338                      |
| Pseudocoumidine, Derivatives of: (Auwers.) (iv, 1885).....                                                                 | 739                      |
| (Noeltling and Bannmann.) (iv, 1885).....                                                                                  | 397, 459                 |
| Purpurin and Xantho Purpurin, Synthesis of. (Noah.) (v, 1886).....                                                         | 319                      |
| Purpurine, Oxidation of. (Dralle.) (iii, 1884).....                                                                        | 242                      |
| Purpurogallol. (Hooker.) (vii, 1888).....                                                                                  | 31                       |
| Pyrazine, Basic Compounds derived from. (P) Newton. From The Farbenfabriken vormals Bayer and Co. (xiii, 1894).....        | 510                      |
| Pyridine Dicarbenic Acid. (Noeltling and Collin.) (iv, 1885).....                                                          | 398                      |
| Pyridinemonosulphonic Acid. (Fischer and Reimerschmid.) (ii, 1883).....                                                    | 377                      |
| Pyrocatechol, Action of Chlorine on. (Zincke and Küster.) (ix, 1890).....                                                  | 601                      |
| Pyrocatechin, Production of. (P) Baum. (xiii, 1894).....                                                                   | 879                      |
| Pyrogallol and its Salts. (Godeffroy.) (xiv, 1895).....                                                                    | 659                      |

| Thiophenol. (Biedermann.) (v, 1886).....                                                                                       | 481  |
| Thiophenols, Preparation of. (Leuekart.) (viii, 1889).....                                                                     | 187  |
| Thioxanthone, Production of. (Ziegler.) (ix, 1890).....                                                                        | 1026 |
| Thymonime, Preparation of. (Bayrac.) (xi, 1892).....                                                                           | 996  |
| Toluene Derivatives, Prod. of. (P) Loesner. (xiv, 1895).....                                                                   | 32   |
| Toluidine Derivatives, Prop. of. (P) Stadel. (ii, 1883).....                                                                   | 212  |
| Toluidines. (Lewy.) (v, 1886).....                                                                                             | 481  |
| Tolunaphthazines, Isomeric. (Witt.) (vi, 1887).....                                                                            | 506  |
| Tolunolines, Derivatives of. (Noelting and Trautmann.) (xi, 1892).....                                                         | 27   |
| Tolylene-Diamine, Conversion of, into a New Amidocresol, and into $\gamma$ -Oreim. (Wallach.) (ii, 1883).....                  | 39   |
| Tolylglycocine, p-. (Bischoff and Hausdorfer.) (xi, 1892).....                                                                 | 808  |
| Triamidodiphenylmethane and its Derivatives, Preparation of. (P) Fischer. (i, 1882).....                                       | 147  |
| Tribenzylamine, Action of Sodium on. (Jackson and Wing.) (v, 1886).....                                                        | 377  |
| Tribenzylamine, Preparation of. (Leuekart.) (iv, 1885).....                                                                    | 711  |
| Tribromophenol, Action of Sulphuric Acid on. (Georgesco.) (ix, 1890).....                                                      | 731  |
| Trihydroxyaurin, Production of, from Catechol. (Caro.) (xii, 1893).....                                                        | 349  |
| Trihydroxyanthralene Monosulpho Acid. (P) Newton, From Farbenfabriken vormals Bayer and Co. (xiii, 1894).....                  | 1054 |
| Trimethylanthracenol. (Wende.) (vi, 1887).....                                                                                 | 541  |
| Trinitrotoluene, Prep. of $\alpha$ -. (Hausermann.) (xi, 1892).....                                                            | 235  |
| Triphenylamine Derivatives. (Herz.) (ix, 1890).....                                                                            | 1027 |
| Triphenyldioxazine as an Oxidation Product of Orthoamidophenol. (Seidel.) (ix, 1890).....                                      | 492  |
| Triphenylmethane, Action of Potassium on. (Hanriot and St. Pierre.) (viii, 1889).....                                          | 877  |
| Triphenylmethane, Colouring Derivatives of. (Noelting and Polonowsky.) (xi, 1892).....                                         | 343  |
| Triphenylmethane Derivatives :<br>(Kock.) (vi, 1887).....                                                                      | 653  |
| (Noelting.) (x, 1891).....                                                                                                     | 456  |
| (Purkin.) (iv, 1885).....                                                                                                      | 429  |
| (Renouf.) (ii, 1883).....                                                                                                      | 375  |
| (Ullmann.) (vi, 1887).....                                                                                                     | 816  |
| Triphenylmethane Derivatives, New Synthesis of. (Walter.) (xiv, 1895).....                                                     | 745  |
| Triphenylmethane, Dyestuff Derivatives of. (Noelting and Schwartz.) (xi, 1892).....                                            | 25   |
| Triphenylmethane, Oxidation of. (Hanriot and St. Pierre.) (viii, 1889).....                                                    | 877  |
| Triphenylmethane, Synthesis of. (Griepentrog.) (v, 1886).....                                                                  | 482  |
| Triphenylmethane, Violet Derivatives of. (Fischer and Kerner.) (iii, 1884).....                                                | 249  |
| Triphenylmethanedicarboxylic Acid. (vi, 1887).....                                                                             | 215  |
| Triquinylmethane, Production of. (Noelting and Schwartz.) (x, 1891).....                                                       | 827  |
| Trisulphonic Acid. (Jackson and Hartshorn.) (ix, 1890).....                                                                    | 852  |
| Trisulphonic Acids of $\beta$ -Naphthol, Azo Colours from. (P) Farbwerke vormals Meister, Lucius, and Bruning. (ii, 1883)..... | 213  |
| Turkey-Red Lake, Preparation of. (Muller-Jacobs.) (i, 1882).....                                                               | 399  |
| Ulm-Brown, Manufacture of. (P) Haddan. From La Banque Indust. de Belg. (iii, 1884).....                                        | 106  |
| Ultramarine. (Guckelberger.) (i, 1882, 399; (ii, 1883).....                                                                    | 240  |
| Ultramarine Blue, Action of Carbonic Acid on. (Buchner.) (vi, 1887).....                                                       | 507  |
| Ultramarine, Development of Manufacture of. (Rohrig.) (ii, 1883).....                                                          | 408  |
| Ultramarine, Manufacture of. (P) Bouillet. (v, 1886).....                                                                      | 523  |
| Ultramarine, Preparation of, by Wet Method. (Knapp.) (v, 1886).....                                                            | 238  |
| Violet, Separation of Red Shades of Acids, into Magenta and Violet. (Mehola.) (viii, 1889).....                                | 535  |
| Violette Solide of H. Koechlin. (Fabst.) (ii, 1883).....                                                                       | 240  |
| Xylene, Quantitative Determination of Ortho-, Meta-, and Para-. (Levinstein.) (iii, 1884).....                                 | 77   |
| Xylenol, Preparation of $\alpha$ -. (Tohl.) (iv, 1885).....                                                                    | 739  |
| Xylidine Ponceau. (Blondel.) (i, 1882).....                                                                                    | 315  |
| Xylidine, Preparation of $\alpha$ -. (Tohl.) (iv, 1885).....                                                                   | 739  |
| Xylidine Scarlet, Production of. (Lauker and Grabowski.) (i, 1882).....                                                        | 353  |
| Xylidines, Separation of Isomeric from Commercial. (P) Limpach. (viii, 1889).....                                              | 281  |
| Xylidines, Six Isomeric. (Noelting and Porel.) (iv, 1885).....                                                                 | 742  |

|-----------------------------------------------------------------------------------------------------------|------|
| For Moulds, Elastic. (P) Hérisse. (xiii, 1894) .....                                                      | 1211 |
| For Mural Decorations. (P) Bennett and Peet. (v, 1886) .....                                              | 603  |
| For Paving Blocks, Slabs, &c. (P) Jost. (xiv, 1895) .....                                                 | 752  |
| For Preserving Animal and Vegetable Substances. (P) Lake. From Choate. (viii, 1889) .....                 | 301  |
| For Preserving Vegetable Fibre. (P) Lake. From Gayle. (xii, 1893) .....                                   | 761  |
| For Preventing Boiler Incrustations:                                                                      |      |
| (P) Bandet. (i, 1882) .....                                                                               | 487  |
| (P) Lattuada. (iii, 1884) .....                                                                           | 101  |
| (P) Pratt. (ix, 1890) .....                                                                               | 44   |
| For Preventing Decay in Wood. (P) McMahon. (ix, 1890) .....                                               | 819  |
| For Preventing Fouling of Ships' Bottoms, &c. (P) Wotton. (viii, 1889) .....                              | 403  |
| For Preventing Incrustation of Steam Boilers. (P) Parsons. (ix, 1890) .....                               | 168  |
| For Preventing Scale in Steam Boilers. (P) Hamilton. (viii, 1889) .....                                   | 715  |
| For Producing Silky Finish on Fabrics. (P) Milneveigh. (xii, 1893) .....                                  | 921  |
| For Prod. of Marble-like Plaster. (P) Bammann. (xii, 1893) .....                                          | 1037 |
| For Protecting Iron Surfaces. (P) Brydson. (iv, 1885) .....                                               | 459  |
| For Protecting Lead Surfaces. (P) McDonald. (xii, 1894) .....                                             | 893  |
| For Protecting Metals from Rust. (P) Thompson. From Schler and Bürger. (xii, 1893) .....                  | 849  |
| For Protecting Ships' Bottoms. (P) Binns and Paris. (viii, 1889) .....                                    | 291  |
| For Protection of Bright Surfaces. (P) Maxwell. (x, 1891) .....                                           | 714  |
| For Refining Malt Liquors. (P) Roskilly. (x, 1891) .....                                                  | 265  |
| For Removing Boiler Incrustations. (P) Brookbanks. (vi, 1887) .....                                       | 812  |
| For Rendering Writing Indelible. (P) Simpson. (ix, 1890) .....                                            | 321  |
| For Repairing Stoneware, &c. (P) Elliot. (xiv, 1895) .....                                                | 159  |
| For Roads, Pavements, &c. (P) Cory. (xiv, 1895) .....                                                     | 807  |
| For Sanitary Reagent, &c. (P) Courtbold. (x, 1891) .....                                                  | 1021 |
| For Softening and Purifying Water. (P) Lipscombe. (vi, 1887) .....                                        | 672  |
| For Softening Refractory Ores. (P) Hopper. (x, 1891) .....                                                | 145  |
| For the Dissolution and Prevention of Boiler Scale. (P) Efrém. (ix, 1890) .....                           | 728  |
| For the Protection of Iron and Steel Structures. (P) Holzapfel. (vii, 1888) .....                         | 683  |
| For Treating Plants. (P) Pitt. From Schlossing. (xii, 1893) .....                                         | 286  |
| For Treating Sewage. (P) Sharp and Petrie. (xiii, 1894) .....                                             | 1216 |
| For Uniting Metal to Glass. Earthenware, &c. (P) Doulton and Slater. (xii, 1893) .....                    | 763  |
| For Uses as Food, and Prep. of. (P) Taffin. (xiii, 1894) .....                                            | 752  |
| For Wall-Plastering, &c. (P) Keim. (xiv, 1895) .....                                                      | 486  |
| For Washing and Cleaning. (P) Bowden, Penn, and Downing. (ix, 1890) .....                                 | 814  |
| For Washing, &c. (P) Pitt. (xii, 1893) .....                                                              | 771  |
| For Waterproofing:                                                                                        |      |
| (P) Baker. (xii, 1893) .....                                                                              | 692  |
| (P) Baldwin. From Smith. (viii, 1889) .....                                                               | 808  |
| (P) Knowlton. (xiv, 1895) .....                                                                           | 652  |
| (P) McLea and Punshon. (vii, 1888) .....                                                                  | 573  |
| (P) Wilson. (vii, 1888) .....                                                                             | 320  |
| For Waterproofing Walls, Roofs, &c. (P) Cliffe. (viii, 1889) .....                                        | 51   |
| Heat Non-Conducting. (P) Birbeck. From Michell. (xii, 1893) .....                                         | 835  |
| Manuf. of, as Substitute for Silk. (P) Du Vivier. (ix, 1890) .....                                        | 286  |
| Or Varnish, for Protection of Tanks, Ships, &c. from Action of Petroleum. (P) Andrews. (viii, 1889) ..... | 291  |
| Plastic, as a Substitute for Celluloid. (P) Eckstein. (ix, 1890) .....                                    | 954  |
| Plastic, Manufacture of a New. (P) Menzies. (xi, 1892) .....                                              | 697  |
| Preservative, for Stone, &c. (P) Clery. (xii, 1893) .....                                                 | 1037 |
| Waterproofing, for Stone, &c. (P) Sinclair and Mackay. (x, 1891) .....                                    | 374  |
| Compositions and Apparatus for Coating Metal Structures. (P) Wailes and Lyeve. (viii, 1889) .....         | 291  |
| For Cleaning and Polishing. (P) Ashley. (viii, 1889) .....                                                | 467  |
| For Cleaning. (P) Stone. (ix, 1890) .....                                                                 | 299  |
| For Coating Submerged Surfaces:                                                                           |      |
| (P) Day. (xi, 1892) .....                                                                                 | 694  |
| (P) Wallace and Ward. (vii, 1888) .....                                                                   | 443  |
| For Manufacture of Pottery. (P) Tompkinson. (xii, 1893) .....                                             | 691  |
| For Moulding or Turning. (P) Lake. From Todd. (vi, 1887) .....                                            | 550  |
| For Preparing and Coating Fabrics. (P) Heyde. (ix, 1890) .....                                            | 504  |
| For Preserving Liquids. (P) Pickles. (xiii, 1894) .....                                                   | 1083 |
| For Renovating Plush, &c. (P) Thompson. From Mautner. (x, 1891) .....                                     | 923  |
| For Self-Lubricating Bearings. (P) Inrray. From Newell. (xii, 1893) .....                                 | 586  |
| For Steam Boilers. (P) Clayton. (xii, 1893) .....                                                         | 661  |
| For Treatment of Sewage. (P) Burghardt. (xiii, 1894) .....                                                | 832  |
| Leather. (P) Tuteau and Goulborne. (vii, 1888) .....                                                      | 220  |
| Non-Conducting. (P) Stanford. (v, 1886) .....                                                             | 100  |
| Non-Corrosive and Anti-Fouling. (P) Davison. (vii, 1888) .....                                            | 854  |
| Self-Lubricating, for Bearings, &c. (P) Holmes. (ix, 1890) .....                                          | 301  |
| Compound, a Buoyant, and Water-tight Case for. (P) Wood. (viii, 1889) .....                               | 625  |
| Anti-Corrosive, Manufacture of. (P) Fulton. From Schmid. (ix, 1890) .....                                 | 814  |
| Antiseptic, for Perishable Articles. (P) Daniels. (viii, 1889) .....                                      | 411  |
| Bodies, Apparatus for Composing. (P) Lorrain. (v, 1886) .....                                             | 615  |
| Electric Insulating:                                                                                      |      |
| (P) Bärnhielm and Jermander. (xiii, 1894) .....                                                           | 531  |
| (P) Gutzsch and others. (xii, 1893) .....                                                                 | 848  |

|-----------------------------------------------------------------------------------------------------------------|--------------------|
| For Alimentary and Medicinal Purposes. (P) Abel. From Boehringer. (xii, 1893) .....                             | 370                |
| For Carburising Metals. (P) Brown. (xi, 1892) .....                                                             | 616                |
| For Cleansing and Bleaching Fabrics. (P) Parker. (ix, 1890) .....                                               | 174                |
| For Cleansing Fabrics, &c. (P) Hodekinson. (vi, 1887) .....                                                     | 727                |
| For Coating Ships' Bottoms. (P) Seabrook. (vii, 1889) .....                                                     | 468                |
| For Coating Walls. (P) Norwood. (xi, 1892) .....                                                                | 606                |
| For Covering Electric Wires. (P) Merritt. (vi, 1887) .....                                                      | 558                |
| For Electric Insulating. (P) Sinclair and Mackay. (x, 1891) .....                                               | 706                |
| For Extinguishing Fires, Liquid. (P) Abel. From Neven. (ii, 1883) .....                                         | 541                |
| For Generating Carbon Dioxide, &c. (P) Grimshaw. (x, 1891) .....                                                | 253                |
| For Insulating, &c. (P) Banks. (xi, 1892) .....                                                                 | 927                |
| For Manufacturing Moulded Articles. (P) Lake. From Lee. (viii, 1889) .....                                      | 781                |
| For Plastering. (P) Hitchins. (vi, 1887) .....                                                                  | 510                |
| For Polishing Metals and Glass. (P) Bietski. (x, 1891) .....                                                    | 263                |
| For Preparing Starch or Flour Size. (P) Waite. (vi, 1887) .....                                                 | 375                |
| For Preventing and Removing Boiler Incrustation. (P) Wade. (vi, 1887) .....                                     | 39                 |
| For Preventing Pores in Metals. (P) Burger and Maunheimer. (x, 1891) .....                                      | 775                |
| For Producing Designs on Fabrics. (P) Lake. From Whitefield. (vi, 1887) .....                                   | 508                |
| For Protecting Iron and Steel. (P) Lehmann. (xii, 1893) .....                                                   | 364                |
| For Purification of Sewage. (P) Chinnock and others. (xii, 1893) .....                                          | 617                |
| For Removing Boiler Incrustation:                                                                               |                    |
| (P) van Look. (viii, 1889) .....                                                                                | 971                |
| (P) Wade. (x, 1891) .....                                                                                       | 240                |
| For Removing Paint:                                                                                             |                    |
| (P) Brentini. (viii, 1889) .....                                                                                | 716                |
| (P) Oates. (viii, 1889) .....                                                                                   | 552                |
| (P) Tessen. (xiii, 1894) .....                                                                                  | 1209               |
| For Removing Varnish. (P) Oates. (viii, 1889) .....                                                             | 552                |
| For Scouring Textiles, Detergent. (P) Brothers. (xiii, 1894) .....                                              | 269                |
| For Silver Plating. (P) Culley. (xii, 1893) .....                                                               | 767                |
| For Treating Fuel. (P) Lake. From The Standard Coal and Fuel Company. (x, 1891) .....                           | 246, 246, 246, 825 |
| For Uses as Paint. (P) Condy. (ix, 1890) .....                                                                  | 814                |
| For Use in Manufacture of Matches. (P) Priester. (xiii, 1894) .....                                             | 661                |
| For Use in Manufacture of Paper. (P) Applezarth. (x, 1891) .....                                                | 268                |
| For Washing, &c. (P) Lake. From Castellani. (xii, 1893) .....                                                   | 352                |
| For Welding, Tempering, &c. Metals. (P) Fisher. From Lord. (viii, 1889) .....                                   | 898                |
| Medicinal and Nutritive. (P) Clowes. (xiv, 1895) .....                                                          | 982                |
| Metallic, for Flooring, Paving, &c. (P) Wilkes and Millar. (iv, 1885) .....                                     | 675                |
| Of Antipyrine and Iodine, Manufacture of. (P) Inrray. From The Farb. vorm. Meister and others. (x, 1891) .....  | 1028               |
| Plastic, Manufacture of a. (P) Ritter von Pischhof. (xiv, 1895) .....                                           | 495                |
| Production of a Cleansing. (P) Schicht. (xii, 1893) .....                                                       | 1044               |
| Production of a Washing. (P) Waddell. (x, 1891) .....                                                           | 1015               |
| Resistant, for Battery-Room Floors, &c. (P) Crompton and Jenkinson. (ix, 1890) .....                            | 1038               |
| Resulting from Reaction of a Methyl-phenyl-hydrazine and Salicylaldehyde. (P) Roos. (xii, 1893) .....           | 289                |
| Compounds:                                                                                                      |                    |
| Anti-Corrosive and Anti-Fouling. (P) Dejonge. (x, 1891) .....                                                   | 557                |
| Anti-Fouling, for Ships' Bottoms. (P) Dejonge. (x, 1891) .....                                                  | 1017               |
| Antiseptic Washing. (P) Ascough. (viii, 1889) .....                                                             | 991                |
| Apparatus for Decomposing Chemical:                                                                             |                    |
| (P) Adams. (viii, 1889) .....                                                                                   | 989, 989           |
| (P) Lake. From Peck. (viii, 1889) .....                                                                         | 868                |
| Artificial Medicinal. (viii, 1889) .....                                                                        | 1004               |
| Carbonaceous. (P) Acheson. (xii, 1893) .....                                                                    | 847                |
| Cleaning, Manuf. of. (P) Fisher and McLay. (ix, 1890) .....                                                     | 814                |
| Colour-Reactions of Organic. (Nickel.) (viii, 1889) .....                                                       | 821                |
| Detergent, containing Ammonia. (P) Thompson. From Parsons. (viii, 1889) .....                                   | 403                |
| Digestive. (P) Carrick. (xiv, 1895) .....                                                                       | 885                |
| Electric Insulating. (P) Williams. (ix, 1890) .....                                                             | 743                |
| Explosive. (P) Newton. From Nobel. (viii, 1889) .....                                                           | 725                |
| For Alimentary and Medicinal Purposes. (P) Johnson. From Boehringer and Soehne. (xiii, 1894) .....              | 759                |
| For Chemical Tanning. (P) Gerson. (vii, 1888) .....                                                             | 683                |
| For Coating Sulphuric Acid Distillation Vessels. (P) Walters. (i, 1882) .....                                   | 26                 |
| For Destroying Insects on Plants and Animals, and for use as Soaps. (P) Kingzett. (v, 1886) .....               | 102, 102, 102      |
| For Dyeing, Manufacture of. (P) Inrray. From The Farbwerke vorm. Meister, Lucius, and Bruning. (ix, 1890) ..... | 854                |
| For Embalming Purposes. (P) Thompson. From Bate and others. (ix, 1890) .....                                    | 1039               |
| For Lubricating. (P) Morgan. (ix, 1890) .....                                                                   | 299                |
| For Making Bread, &c. (P) Preston. (xii, 1893) .....                                                            | 794                |
| For Manufacture of Fermented Beverages. (P) Heron. (xiii, 1894) .....                                           | 1082               |
| For Precipitating Sewage. (P) Levestein. (xiii, 1894) .....                                                     | 1216               |
| For Vulcanising Rubber. (P) Fawcett. (x, 1891) .....                                                            | 1016               |
| For Waterproofing Leather. (P) Lewis. (xiii, 1894) .....                                                        | 532, 532           |
| Glazing, Antiseptic, and Washing, Manufacture of. (P) Ascough. (ix, 1890) .....                                 | 68                 |

## Compounds—cont.

|                                                                                                                      |                       |
|----------------------------------------------------------------------------------------------------------------------|-----------------------|
| Medicinal, Production of. (P) Johnson. From von Heyden. (x, 1891).....                                               | 1027                  |
| Metallic, Manufacture of. (P) de Pass. From Thofchern. (xiii, 1894).....                                             | 158                   |
| Metallic, Prod. of. (P) Sinclair and Smith. (viii, 1889)....                                                         | 329                   |
| Of Hydrogen Cyanide with Anilides of the Sugars. (Miller, Plochl, and Strauss.) (xiii, 1894).....                    | 767                   |
| Of Metals and Sulphur, Electrolytic Decomposition of. (P) Abel and Murray. From Siemens and Halske. (xii, 1893)..... | 817                   |
| Of Metals and Sulphur, Treatment of. (P) Lewis and Gelstharp. (xii, 1893).....                                       | 842                   |
| Of Sugars with Polyhydric Phenols. (Fischer and Jennings.) (xiii, 1894).....                                         | 765                   |
| Of the Citral Group. (Tiemann and Semmler.) (xiii, 1894).....                                                        | 417                   |
| Of the Quinine Alkaloids. (Hesse.) (viii, 1889).....                                                                 | 721                   |
| Of Weak Acid Character, Relative Strengths of. (Shields.) (xii, 1893).....                                           | 632                   |
| Oleaginous or Saponeaceous, for Producing Medicinal Emulsions or Disinfectants. (P) Klever. (xiii, 1894).....        | 754                   |
| Pharmaceutical, Production of. (P) Wilcox. From The Farbenfabriken vormals Bayer and Co. (xii, 1893)....             | 289                   |
| Plastic:                                                                                                             |                       |
| (P) Gooden. (iv, 1886).....                                                                                          | 172                   |
| (P) Justice. From Gravelin. (viii, 1889).....                                                                        | 625                   |
| Plastic, Manufacture of, and Apparatus therefor. (P) de Vasson and The Soc. dite "La Suberine." (x, 1891).....       | 771                   |
| Relation between Chemical Composition and Absorption Spectra of Organic. (Althausse and Krüss.) (viii, 1889).....    | 1012                  |
| Relation between Composition and Colour of. (Schulze.) (xi, 1892).....                                               | 867                   |
| Sanitary and Antiseptic. (P) Hannan (viii, 1889).....                                                                | 1001                  |
| Separating Constituents of Gaseous and Liquid. (P) Windhausen. (xii, 1893).....                                      | 741                   |
| Vulcanised Plastic. (P) Boulton. From Kiel. (viii, 1889).....                                                        | 204                   |
| Vulcanised Plastic, Manufacture of. (P) Boulton. From Kiel. (ix, 1890).....                                          | 398, 351              |
| Compressing App. for Gases. (P) Pullman and Lane. (xii, 1893).....                                                   | 28                    |
| Compression and Exhaustion Apparatus, Combined. (Gawlowicki.) (iv, 1885).....                                        | 757                   |
| Apparatus for Determining. (P) Schickert. (i, 1882).....                                                             | 389                   |
| Apparatus for Testing Materials in. (Bonami.) (ix, 1890).....                                                        | 215                   |
| Compressors, Air. (P) Johnson and Hutchinson. (xi, 1892).....                                                        | 963                   |
| Use of Oil in Ammonia Gas. (von Strombeck.) (xi, 1892).....                                                          | 733                   |
| Concentrates, Treatment of Pyrites, by Cyanide. (Crosse.) (xiv, 1895).....                                           | 753                   |
| Concentrating Apparatus:                                                                                             |                       |
| (P) Allott. (iv, 1885).....                                                                                          | 196                   |
| (P) Atterbury and Ewens. (xii, 1893).....                                                                            | 764                   |
| (P) Croll. (vi, 1887).....                                                                                           | 823                   |
| (P) Dyson. (xiii, 1894).....                                                                                         | 1059                  |
| (P) Flottmann. (x, 1891).....                                                                                        | 128                   |
| (P) Guttman. (xii, 1893).....                                                                                        | 1014                  |
| (P) Herman. (x, 1891).....                                                                                           | 239                   |
| (P) Levinstein. (xii, 1893).....                                                                                     | 156                   |
| (P) Mirkles and Ballinghall. (xi, 1892).....                                                                         | 895                   |
| (P) Raeymaekers. (ix, 1890).....                                                                                     | 878                   |
| (P) Scott. (xii, 1893).....                                                                                          | 915                   |
| Apparatus for Acids. (P) Heraeus. (vi, 1892).....                                                                    | 36                    |
| Apparatus for Saccharine Liquids. (P) Stewart. (xi, 1892).....                                                       | 1018                  |
| Apparatus for Sulphuric Acid. (P) Kessler. (xi, 1892).....                                                           | 494                   |
| Apparatus, Multiple Effect. (P) Deacon. From Maxwell. (xi, 1892).....                                                | 830                   |
| Apparatus, used in United States. (Martyn.) (iv, 1885)....                                                           | 27                    |
| Or Evaporating Vessels. (P) Glover and Brock. (xiv, 1895).....                                                       | 791                   |
| <i>See also under</i> Evaporating Apparatus.                                                                         |                       |
| Concerts, Smoking. (viii, 1889).....                                                                                 | 518; (xii, 1893)..... |
|                                                                                                                      | (xiii, 1894).....     |
| Concrete, App. for Prod. of. (P) Carey and Latham. (v, 1886).....                                                    | 100                   |
| Blocks for Paving or Building. (Frobach and Huppertsburg.) (xi, 1892).....                                           | 818                   |
| For Paving. (P) Potter. (xiv, 1895).....                                                                             | 274                   |
| For Vaults, &c. (P) Sang. (x, 1891).....                                                                             | 643                   |
| Hygienic or Sanitary. (P) Tottrell. (iv, 1885).....                                                                  | 415                   |
| Manufacture of Blocks of Coloured. (P) Ward. (xi, 1892).....                                                         | 1012                  |
| Portland Cement:                                                                                                     |                       |
| (Bamber, Carey, and Smith.) (xi, 1892).....                                                                          | 1007                  |
| (Brausewetter.) (ix, 1890).....                                                                                      | 73                    |
| Prevention of Action of Frost on Portland Cement. (x, 1892).....                                                     | 165                   |
| Concretes, Manufacture of. (P) Ponton. (v, 1886).....                                                                | 351                   |
| Condenser, Commutating Arrangement for. (Bidet.) (xiii, 1894).....                                                   | 661                   |
| For Beer. (P) Evenden. (i, 1882).....                                                                                | 378                   |
| For Laboratory use. (Evers.) (xi, 1892).....                                                                         | 635                   |
| For Producing Distilled Water. (P) Cotton and Garrett. (xi, 1892).....                                               | 148                   |
| For Tar Distilling. (P) Mohr. (ii, 1883).....                                                                        | 267                   |
| For use in Manufacture of Gas. (P) Mohr. (ii, 1883).....                                                             | 164                   |
| Glass Tower. (Herman.) (ix, 1890).....                                                                               | 147                   |
| Internally Cooled. (Bidet.) (xiii, 1894).....                                                                        | 661                   |
| Metallic Inverted. (Donath.) (xii, 1893).....                                                                        | 181                   |
| Condensers. (P) Reed. (xi, 1892).....                                                                                | 803                   |
| Direct-Acting Steam Pumps with. (P) Leinbaas and Hulsenberg. (i, 1882).....                                          | 391                   |
| For Acid Fumes. (P) Doulton and Sanceau. (xiv, 1895).....                                                            | 658                   |
| For Acids and Gases. (P) Herman. (vii, 1888).....                                                                    | 845                   |
| For Laboratories. (Walter.) (viii, 1894).....                                                                        | 761                   |
| Gas. (P) Cutler. (xiii, 1894).....                                                                                   | 626                   |
| Preparation of Porous Silicious Materials for Acid. (P) Claus. (ii, 1883).....                                       | 281                   |
| Water Meter for HCl. (Schuler.) (xiv, 1895).....                                                                     | 803                   |

## Condensing Apparatus:

|                                                                                            |                   |      |
|--------------------------------------------------------------------------------------------|-------------------|------|
| (P) Abel. From Theisen. (xii, 1893).....                                                   | 347               |      |
| (Adrian.) (viii, 1889).....                                                                | 184               |      |

| Treatment of:                                                 |      | (P) Kerr. (xi, 1892)                                                | 523      |
| (P) Bolanachi. (xii, 1893)                                    | 855  | Heating, by Electricity:                                            |          |
| (P) Mountfort and Prior. (xiii, 1894)                         | 412  | (P) Girard and Street. (xiv, 1895)                                  | 739      |
| Creatine. (viii, 1889)                                        | 476  | (P) Mitchell. (xii, 1893)                                           | 699, 699 |
| Physiological Action of. (viii, 1889)                         | 131  | How to use Plumbago. (Walker.) (xiv, 1895)                          | 278      |
| Crocin. (Weyl.) (viii, 1889)                                  | 274  | Machine for Making. (P) Sims. (viii, 1889)                          | 186      |
| Customs Regulations for, in Austria-Hungary. (T.R.)           |      | Manufacture of:                                                     |          |
| (ix, 1890)                                                    | 434  | (P) Digby. (xiii, 1894)                                             | 158      |
| Cresol-Carboxylic Acid. (Wende.) (v, 1886)                    | 599  | (P) Fould and Geureau. (vi, 1887)                                   | 43       |
| Producing Esters from. (P) Abel. From von Heyden              |      | (P) Inray. From Moszczensky. (vii, 1888)                            | 631      |
| Nachfolger. (xiii, 1894)                                      | 275  | (P) Payne. (vi, 1887)                                               | 292      |
| Cresote. (viii, 1889)                                         | 567  | (P) Waterhouse. (ii, 1883)                                          | 543      |
| Apparatus for Burning. (P) Allen. (xiii, 1894)                | 1050 | Manufacture of Magnesia. (P) Johnson. From Mallion.                 | 122      |
| Aqueous Solution of. (Carles.) (xii, 1893)                    | 945  | (iv, 1885)                                                          |          |
| Benzoyl-Guaicacol as a Substitute for. (Walzer.) (x, 1891)    | 788  | Materials for Manufacture of. (P) Lyte. (v, 1886)                   | 382      |
| Detection of. (Krenel.) (vii, 1888)                           | 526  | Removal of Fused Masses from Platinum. (Koninek.)                   | 869      |
| Determination of Phenol in. (Kleinert.) (iii, 1884)           | 318  | (vii, 1888)                                                         |          |
| Disinfecting Properties of. (Frankel.) (viii, 1889)           | 912  | Steel Smelting in Acid and Basic. (Brand.) (iii, 1884)              | 572      |
| Estimation of. (Schlicht.) (xii, 1893)                        | 651  | Triangle for Supporting. (de la Harpe.) (iv, 1885)                  | 510      |
| Examination of:                                               |      | Crucifera, Mustard Oil in Seed of. (Forster.) (viii, 1889)          | 220      |
| (Brandes.) (viii, 1889)                                       | 422  | Sulphur Compounds of the. (Smith.) (vii, 1888)                      | 854      |
| (Hager.) (i, 1882)                                            | 351  | Sulphur Essences of the. (Guignard.) (ix, 1890)                     | 1149     |
| Guaicacol in Wood. (Bongartz.) (xi, 1892)                     | 511  | Crusher and Pulveriser. (P) Morison. (xi, 1892)                     | 147      |
| History of. (Schorlemmer.) (iv, 1885)                         | 152  | Crushing Apparatus:                                                 |          |
| Magnesia. (Thedenius.) (xiv, 1895)                            | 593  | (P) Askham. (xi, 1892)                                              | 994      |
| Oil, Examination of. (Staveley.) (viii, 1889)                 | 1013 | (P) Thompson. (xi, 1892)                                            | 20       |
| Oils, Frae, Distill. of Phenols from. (Smith.) (ii, 1883)     | 497  | App. for Minerals. (P) Morel and Hempel. (xiii, 1894)               | 623      |
| Preparation of, from Wood-Tar. (ii, 1883)                     | 473  | Crust in Gas Producers, Apparatus for Breaking Down. (P)            |          |
| Producing Esters from. (P) Abel. From von Heyden              |      | Hall. (xiii, 1894)                                                  | 627      |
| Nachfolger. (xiii, 1894)                                      | 275  | Crustacea, Methods for Preserving. (P) Mewburn. From                |          |
| Specification for Coal-Tar. (Tidy.) (iv, 1885)                | 531  | Bate. (vi, 1887)                                                    | 832      |
| Volatility of. (Reismann.) (x, 1891)                          | 850  | Cryolite and its Substitutes in Glass Manufacture. (Zsigmondy.)     |          |
| White Tanning with Addition of. (P) Harcke. (i, 1882)         | 73   | (viii, 1889)                                                        | 194      |
| Cresotes, Composition of Official Beech and Oak. (Behal       |      | Dissociation of Aluminium Fluoride from Artificial. (As-            |          |
| and Choay.) (xiii, 1894)                                      | 1087 | both.) (ix, 1890)                                                   | 945      |
| From Beech and Oak, Composition of. (Behal and Choay.)        |      | Electrolysis of. (Hampe.) (viii, 1889)                              | 287      |
| (xiii, 1894)                                                  | 1187 | Estimation of Silicon and Iron in. (Presenius and Hintz.)           |          |
| Official, and Guaicacol. (Behal and Choay.) (xii, 1893)       | 618  | (viii, 1889)                                                        | 572      |
| Cresotated Articles, Painting. (P) Hughes. (xi, 1892)         | 620  | Manufacture of Aluminium from:                                      |          |
| Cresoting Agents, Permanency of. (Clark.) (ix, 1890)          | 1005 | (Bedson.) (viii, 1889)                                              | 985      |
| Cresol, Action of Phosphorus Trisulphide on. (Geuther.)       |      | (Dagger.) (x, 1891)                                                 | 433      |
| (iii, 1884)                                                   | 162  | (P) Netto. (ix, 1890)                                               | 194      |
| Amido-, Conversion of Toluene-diamine into. (Wallach.)        |      | Manufacture of Artificial:                                          |          |
| (ii, 1883)                                                    | 39   | (P) Netto. (ix, 1890)                                               | 305      |
| As an Antiseptic. (Lacroix, Hunkeler and Vian.) (xiii, 1894)  | 273  | (P) Netto. From Winkler. (viii, 1889)                               | 713      |
| Combining Diazo Compounds with. (P) Clark. From               |      | Cryoscopic Methods. (Traube.) (x, 1891)                             | 660      |
| Kreuzener and Farbwerk vormals Bronner. (iv, 1885)            | 400  | Cryptoline. (Brown and Perkin.) (x, 1891)                           | 1023     |
| Compounds, Soluble. (Engler and Dieckhoff.) (xiv, 1895)       | 318  | Crystal Palace Electric Exhibition. (Slingo.) (i, 1882)             | 137      |
| Derivatives. (Baur.) (xi, 1892)                               | 307  | Palace Electric Exhibition: Reception to United Chemical            |          |
| Iodised Sulpho Acids of. (P) Ostermayer. (vii, 1888)          | 745  | Societies. (i, 1882)                                                | 94       |
| Meta-:                                                        |      | Crystalline Constituents of Semen Cataputiae minoris. (Tahara.)     |          |
| (Claus and Dreher.) (viii, 1889)                              | 768  | (x, 1891)                                                           | 157      |
| (Staedel.) (v, 1886)                                          | 237  | Crystallising Apparatus. (P) Thompson. From Morrell and             |          |
| Meta-, Manufacture of. (P) Johnson. From Kalle and            |      | Stringfellow. (xi, 1892)                                            | 895      |
| Co. (xiv, 1895)                                               | 800  | Crystals contained in a Bar of Swedish Steel. (Stoltzer.) (ii,      |          |
| Nitroso-Ortho-. (Nolting and Kohn.) (iii, 1884)               | 245  | 1883)                                                               | 262      |
| Salicylates. (viii, 1889)                                     | 565  | Production of. (P) Morris. (xii, 1893)                              | 925      |
| (Nencki.) (viii, 1889)                                        | 305  | Cuba, Asphalt Deposits in. (T.R.) (xiv, 1895)                       | 204      |
| -Sulphonic Acid, Ortho-. (Hantke.) (vii, 1888)                | 32   | Cocoa-Nut Oil in. (T.R.) (viii, 1889)                               | 226      |
| Sulphonic Acids of Meta-. (Claus and Krauss.) (vii,           |      | Customs Tariff of. (T.R.) (xi, 1892)                                | 714      |
| 1888)                                                         | 32   | Exportation of Manganese from. (T.R.) (ix, 1890)                    | 1078     |
| Cresols and Naphthols. (McMurtree.) (xiv, 1895)               | 1074 | Manufacture of Cane-Sugar in. (Sailhard.) (xiv, 1895)               | 286      |
| Azo and Diazo Compounds of the. (Nolting and Kohn.)           |      | Perfumery Imports in. (T.R.) (xi, 1892)                             | 187      |

(Lintner.) (xiv, 1895).....                                                    | 54                    |
| Optical Isomers of. (Fischer.) (ix, 1890).....                                                                                                                 | 1052 | Action of, on Starch. (Ling and Baker.) (xiv, 1895).....                                                 | 175                   |
| Oxidation of, by Red Oxide of Mercury and Baryta Water. (vi, 1887).....                                                                                        | 554  | Action of, on Ungelatinised Starch. (Lintner.) (ix, 1890).....                                           | 402                   |
| Preparation of, from Sulphite Cellulose. (Lindsey and Tollens.) (xi, 1892).....                                                                                | 885  | Artificial. (Reychler.) (viii, 1889).....                                                                | 407                   |
| Production of. (P) Rumpler. (xi, 1892).....                                                                                                                    | 1019 | Chemical Conditions which Influence Action of. (Eiffert.) (xii, 1893).....                               | 368, 851              |
| Prod. of Volatile Fatty Acids from. (Loew.) (ix, 1890).....                                                                                                    | 637  | Degradation of Starch by Action of. (Lintner and Düll.) (xiii, 1894).....                                | 53                    |
| Ratio of, to Levulose in Sweet Wine, &c. (König and Karsch.) (xiv, 1895).....                                                                                  | 773  | In "Casse" Wines. (Guinard.) (xiv, 1895).....                                                            | 878                   |
| Reduction of Copper Solution by. (Urech.) (iii, 1884).....                                                                                                     | 423  | Influence of, on Beer. (Windisch.) (xii, 1893).....                                                      | 368                   |
| Solubility of Salts of Acetone in Solutions of. (King and McElroy.) (xii, 1893).....                                                                           | 176  | Mixture of Maltase, Dextrinase and. (Wijsman, junr.) (ix, 1890).....                                     | 752                   |
| Diacetones, a New Class of. (Behal and Auger.) (ix, 1890).....                                                                                                 | 280  | Non-crystallisable Products of Action of, on Starch. (Schiffner.) (xii, 1893).....                       | 368                   |
| Action of Diamines on. (Combes.) (viii, 1889).....                                                                                                             | 976  | Of Cereals. (Egloff.) (xiii, 1894).....                                                                  | 1080                  |
| Diacetosuccinic Ether, Action of, on Phenylhydrazine. (Knorr and Bülow.) (iv, 1885).....                                                                       | 61   | Prep. of, for Manuf. of Bread, &c. (P) Fletcher. (x, 1891).....                                          | 1020                  |
| Diacetyl dihydroxyphenazine. (Fischer and Hepp.) (ix, 1890).....                                                                                               | 602  | Preservation of. (Lefmann and Baum.) (vii, 1889).....                                                    | 561                   |
| Diacetyloxanthranol. (Liebermann.) (vii, 1888).....                                                                                                            | 884  | Products of Action of, on Starch. (Brown and Morris.) (iv, 1885).....                                    | 682                   |
| Diacetopiperazine, Diphenyl- $\alpha$ - $\gamma$ , and $\alpha$ - $\delta$ . (Hausdorfer.) (viii, 1889).....                                                   | 978  | Reichler's Artificial. (Egloff.) (xiii, 1894).....                                                       | 1080                  |
| Diacetopiperazines, $\alpha$ - $\beta$ , and Reactions in Formation of Piperazines. (Bischoff and Nastvogel.) (viii, 1889).....                                | 978  | Researches on. (vii, 1888).....                                                                          | 397                   |
| $\alpha$ , $\gamma$ . (Bischoff and Nastvogel.) (viii, 1889).....                                                                                              | 977  | Saccharification by:                                                                                     |                       |
| Diagrams, Showing Percentages of Sucrose and Glucose in Cane Juice. (Alexander.) (v, 1886).....                                                                | 147  | (Lintner.) (viii, 1889).....                                                                             | 470                   |
| Dialyser, A New. (Bauer.) (vii, 1888).....                                                                                                                     | 231  | (Reychler.) (vii, 1889).....                                                                             | 470                   |
| An Easily Constructed. (Huizenga.) (i, 1882).....                                                                                                              | 175  | Studies on. (Lintner and Eckhardt.) (ix, 1890).....                                                      | 91, 318               |
| Dialysis, Separation of Matters in Solution by. (P) Marx. (ix, 1890).....                                                                                      | 196  | Utilisation of Flours Rich in. (P) Briant and Walker. (xiii, 1894).....                                  | 55                    |
| Diamide, Poisonous Character of. (Loew.) (ix, 1890).....                                                                                                       | 1146 | Diazo and Phenolic Group, Molecular Interchange Between. (Lefmann and Boye.) (ix, 1890).....             | 931                   |
| Diamido Base and Colouring Matters therefrom, Manuf. of. (P) Imray. From Farbwerke vormals Meister, Lucius, and Brünig. (xii, 1894).....                       | 384  | Compound, Prod. of a New. (P) Altschul. (xiv, 1895).....                                                 | 145                   |
| Diamido Base and Tetrazo Colouring Matters therefrom, Manufacture of. (P) Thompson and Moore. (xiii, 1894).....                                                | 384  | Compounds. (Schraube and Schmidt.) (xiii, 1894).....                                                     | 508                   |
| Diamido-acenaphthene. (Quinke.) (vii, 1888).....                                                                                                               | 382  | Compounds, Action of Alcohol on. (Remsen.) (ix, 1885).....                                               | 275                   |
| Diamido-anisol Hydrochloride, <i>m-p</i> . (Hahle.) (x, 1891).....                                                                                             | 692  | Compounds, Rate of Decomposition of. (Hausser and Muller.) (xi, 1892).....                               | 672                   |
| Diamidobenzimidines, Transformation of, into Tetrazo Compounds. (P) Paul. (vii, 1888).....                                                                     | 432  | Compounds, Researches on:                                                                                |                       |
| Diamidobenzophenonamine Chlorides, Production and Conversion of Alkylised. (P) Imray. From The Farbwerke vormals Meister, Lucius, and Brünig. (vii, 1888)..... | 205  | (Gattermann.) (ix, 1890).....                                                                            | 823                   |
| Diamidobenzophenones. (Wichelhaus.) (viii, 1889).....                                                                                                          | 536  | (Griess.) (i, 1882).....                                                                                 | 21, 444               |
| Diamidodibenzylbenzidine, &c., Azo Colours from. (P) Bang. From Dahl and Co. (viii, 1889).....                                                                 | 611  | Compounds, Stability of, in Aqueous Solution. (Hirsch.) (x, 1891).....                                   | 535                   |
| Diamidodiphenylpiperazine, Para. (Lefmann and Schleich.) (viii, 1889).....                                                                                     | 699  | Compounds, Synthesis effected by. (Hirsch.) (x, 1891).....                                               | 354; (xii, 1893), 137 |
| Diamidodixylis, Prep. of. (Nolling and Stricker.) (viii, 1889).....                                                                                            | 114  | Diazoamidobenzene. (Fischer.) (iii, 1884).....                                                           | 370                   |
| Diamidoethoxydiphenyl Sulphonic Acid, Colouring Matters from. (Feer.) (vii, 1888).....                                                                         | 589  | Action of Phenol upon. (Heumann and Oeconomides.) (vi, 1887).....                                        | 436                   |
| Diamidogen, Manufacture of. (P) Johnson. From Badische Anilin und Soda Fabrik. (xi, 1892).....                                                                 | 370  | Diazoamidobenzoic Acid. (Noelting.) (xi, 1892).....                                                      | 343                   |
| Diamidonaphthalene. (Griess.) (i, 1882).....                                                                                                                   | 445  | Diazo-amido Compounds, Constitution of. (Meldola and Streiffeld.) (vi, 1887), 283, 721; (vii, 1888)..... | 618                   |
| Diamidonaphthalene-sulpho Acid, Production of. (P) Pitt. From Cassella and Co. (xiii, 1894).....                                                               | 244  | Compounds, Dry Decomposition of. (Hensler.) (x, 1891).....                                               | 71                    |
| Diamidophenanthraquinone, Cotton Dyes from. (Lithauer.) (xii, 1893).....                                                                                       | 672  | Diazoamidodiphenyl- <i>o</i> -Disulphonic Acid. (Limpricht.) (x, 1891).....                              | 690                   |

| Diazobenzene Chloride, Action of, on Sulpho- $\alpha$ -hydroxynaphthoic Acid. (König.) (ix, 1890).....                                     | 601      | Digitalin. (Kiliani.) (xi, 1892).....                                                                                              | 771      |
| Diazo-cumene, Production of. (P) Abel. From The Aetien Gesellschaft für Anilin Fabrikation. (ii, 1883).....                                | 243      | And Tanghinon. (Arnaud.) (ix, 1890).....                                                                                           | 324      |
| Diazonaphthylmonosulphonic Acid, Colouring Matter from $\alpha$ -. (P) Farh. vormals Bayer and Co. (ii, 1883).....                         | 243      | Researches on. (Hondas.) (xi, 1892).....                                                                                           | 454      |
| Diazo-phenols, Azo-compounds from Action of, on $\beta$ -Naphthylamine. (Saechs.) (v, 1886).....                                           | 28       | Researches on Crystallised. (Arnaud.) (ix, 1890).....                                                                              | 323      |
| Diazo-sulphonic Acids, Decomposition of, in Presence of Copper. (Tobias.) (ix, 1890).....                                                  | 824      | Digitalis, Activity of Different. (Bardet.) (ix, 1890).....                                                                        | 324      |
| Diazotype Process of Photo Dyeing and Printing. (Green, Cross and Bevan.) (ix, 1890).....                                                  | 1001     | Of Commerce. (Lafon.) (v, 1886).....                                                                                               | 501      |
| Dibromnitrosophenol. (Fischer and Hepp.) (vii, 1888).....                                                                                  | 316      | Digitalis Extract. (Lenken.) (v, 1886).....                                                                                        | 335      |
| Dibromo-azoresorufinol Hydrobromide. (Brunner and Kramer.) (iv, 1885).....                                                                 | 51       | Digitogenin and Digitonin. (Kiliani.) (x, 1891).....                                                                               | 567      |
| Dibromobrazilin. (Schall and Dralle.) (viii, 1889).....                                                                                    | 700      | Composition of. (Kiliani.) (ix, 1890).....                                                                                         | 820      |
| Dibromocinchonine. (Comstock and Königs.) (iv, 1885).....                                                                                  | 64       | Preparation of Pure. (Kiliani.) (xiii, 1894).....                                                                                  | 834      |
| Dibromodinitrofluorescein. (Mühlhauser.) (vi, 1887).....                                                                                   | 284      | Dihydrochloride, Properties of a crystalline, derived from Eucalyptus Oil. (Anthoine.) (xii, 1893).....                            | 462      |
| Dibromodinitrophenol. (Anwers.) (v, 1886).....                                                                                             | 27       | Dihydrolutidine. (Gautier and Mourgues.) (ix, 1890).....                                                                           | 648      |
| Dibromodinitrophenol. (Mühlhauser.) (vi, 1887).....                                                                                        | 284      | Dihydroxybenzoic Acid, Production of Colouring Matters from. (P) Johnson. From The Badische Anilin und Soda Fabrik. (x, 1891)..... | 759      |
| Dibromogallanilide, Blue Lakes Derived from. (Cazeneuve.) (xiii, 1894).....                                                                | 1098     | Dihydroxydiketotetrahydronaphthalene, Azines and Eurhodies from. (Zincke.) (xii, 1893).....                                        | 671      |
| Dibromopendocumenol. (Auwers.) (v, 1886).....                                                                                              | 27       | Dihydroxydimethylantraquinones, Isomeric. (Kostanecki and Niemcewsky.) (v, 1886).....                                              | 25       |
| Dibromonaphthalene. (Anwers.) (v, 1886).....                                                                                               | 27       | Dihydroxydinaphthylsulphide. (Lange.) (vii, 1888).....                                                                             | 341      |
| Dichloroether, Condensation of, with Cresols. (Bruckner.) (ix, 1890).....                                                                  | 929      | Dihydroxydiphenylamine, Synthesis of. (Seyewitz.) (ix, 1890).....                                                                  | 280      |
| Dichloro- $\alpha$ -naphthoquinone Sulphonic Acid. (Claus and Van der Cloet.) (vii, 1888).....                                             | 319      | Dihydroxynaphthalene, A New. (Claus.) (viii, 1889).....                                                                            | 535      |
| Dichloronaphthalene, $\alpha$ - and $\beta$ -. (Widman.) (i, 1882).....                                                                    | 443      | Dihydroxynaphthalene-sulpho Acids, Manufacture of: (P) Johnson. From Badische Anilin und Soda Fabrik. (xii, 1891).....             | 942      |
| Dichloronaphthalenes, Derivatives of 1:3. (Clève.) (ix, 1890).....                                                                         | 604      | (P) Wilcox. From Farbenfabriken vormals Bayer and Co. (xii, 1893).....                                                             | 504      |
| Dichloronaphthalenesulphonic Acid 1:6:4. (Clève.) (x, 1891).....                                                                           | 1063     | Dihydroxyphenazine Hydrochloride. (Fischer and Hepp.) (ix, 1890).....                                                              | 602      |
| Dichloronaphthoquinoneanilide. (Claus and Mielcke.) (v, 1886).....                                                                         | 378      | Dihydroxyquinone, Action of, on Orthodiamines. (Nietzki and Hasterlik.) (x, 1891).....                                             | 536      |
| Dichroines, Phenoxychrome, &c. (Brunner and Chnit.) (vii, 1888).....                                                                       | 315      | Dihydroxyquinonephenazine. (Nietzki and Schmidt.) (vii, 1888).....                                                                 | 384      |
| Dicinchonine, Preparation of. (Hesse.) (iv, 1885).....                                                                                     | 416      | Dihydroxystearic Acid, Natural. (Juillard.) (xiv, 1895).....                                                                       | 811      |
| Dicotoin of Coto-Bark. (Cianciani and Silber.) (xiv, 1895).....                                                                            | 884      | Dihydroxystilbene, Diphenoltrichlorethane and $p$ -. (Elbs and Hoernum.) (viii, 1889).....                                         | 876      |
| Didier Generator. (Hunt.) (iii, 1884).....                                                                                                 | 94       | Di-iodofluorescein. (Mühlhauser.) (vi, 1887).....                                                                                  | 284      |
| Diehl's Apparatus for Fixing Colours in Cotton by Ammonia. (P) (iv, 1885).....                                                             | 53       | Di-iodoparaphenolsulphonic Acid or Soziodol. (vii, 1888).....                                                                      | 586      |
| Diethylbenzene, Meta-, Preparation of. (Voswinkel.) (viii, 1889).....                                                                      | 114      | Di-iodosalicylic Acid. (Merek.) (ix, 1890).....                                                                                    | 544      |
| Diethyldibenzylidamido-diphenylmethane Disulpho Acid, Manufacture of. (P) Geigy. (x, 1891).....                                            | 1003     | Diketones, Colour Reaction of Some. (Bamberger.) (iv, 1885).....                                                                   | 370      |
| Diethylenediamine, Properties of. (Ladenburg.) (x, 1891).....                                                                              | 788      | Dilution Tables for Practical Use. (Herz.) (ix, 1890).....                                                                         | 112      |
| Diethylene-di-imine. (Ladenburg.) (x, 1891).....                                                                                           | 381      | Dimethylamidoazobenzene as an Indicator in Alkalimetry. (Fischer and Philipp.) (iv, 1885).....                                     | 510      |
| Diethymercaptol, Manufacture of, and of a Sulphone therefrom. (P) Johnson. From The Farbenfabriken vormals Bayer and Co. (viii, 1889)..... | 610      | Dimethylamidoquinoxazone. (Möhlau.) (xi, 1892).....                                                                                | 673      |
| Diethylnaphtholamine, Action of Sulphuric Acid upon, at High Temperatures. (Smith.) (i, 1882).....                                         | 319      | Dimethylaniline Acid, Sulphates of. (Vison.) (vii, 1888).....                                                                      | 744      |
| Diffusibility of Gases through Caoutchouc Membranes. (Reychler.) (xiii, 1894).....                                                         | 181      | Action of Acetic Anhydride on. (Reverdin and de la Harpe.) (xii, 1892).....                                                        | 778      |
| Diffusion Apparatus for Beetroot, Sugar Cane, &c. (P) Lake. From La Cie. de Fives-Lille. (vii, 1888).....                                  | 129      | Action of, in Presence of Aluminium Chloride. (Graud.) (viii, 1889).....                                                           | 877      |
| Battery, Combustible Gases arising from. (Dewald.) (xii, 1894).....                                                                        | 749      | Action of Sulphur on. (Möhlau and Krohn.) (vii, 1888).....                                                                         | 203      |
| Experiments in. (Herzfeld.) (viii, 1889).....                                                                                              | 633      | Alkyl-Hydroxy Derivatives of. (Grimaux.) (x, 1891).....                                                                            | 458      |

(ix, 1890)                                                                                                                                                                                           | 444      | Dipseudocumol. (Auwers.) (v, 1886)                                                                                     | 27       |
| Process for Manufacture of Coal Gas: (Carr.) (viii, 1889)                                                                                                                                                                                         | 960      | Diquinoline, Pyrogenic Formation of. (Zimmermann and Muller.) (iii, 1884)                                              | 626      |
| (Kraemar.) (x, 1891)                                                                                                                                                                                                                              | 685      | Diquinolyne Derivatives, Manufacture of. (P) Wilcox. From the Farbenfabriken vormals Bayer and Co. (x, 1891)           | 383      |
| Diospyros Kaki, L. f. (Hosie.) (xii, 1893)                                                                                                                                                                                                        | 770      | Diresorcinol. (Benedikt and Julius.) (iii, 1884)                                                                       | 476      |
| Dioxanthracene, Preparation of Azo Colouring Matters from. (P) Actien Gesellschaft fur Anilin Fabrikation. (ii, 1883)                                                                                                                             | 274      | Detection of in Synthetic Phloroglucinol. (Herzig and Zeisel.) (ix, 1890)                                              | 909      |
| Preparation of Dyestuffs from. (i, 1882)                                                                                                                                                                                                          | 226      | Diresorcinolmethylbenzoate. (Skrap.) (ix, 1890)                                                                        | 410      |
| Dioxanthraquinone, Preparation of. (Schuler.) (i, 1882)                                                                                                                                                                                           | 401      | Diresorcinophthalen. (Benedikt and Julius.) (iii, 1884)                                                                | 476      |
| Dioxydiphenylmethane, Colouring Matters Derived from. (P) Durand, Huguenin and D'Andrian. (xii, 1893), 756; (xiii, 1894), 145                                                                                                                     |          | Disazo Compounds. (Nietzki and Diesterweg.) (vii, 1888)                                                                | 557      |
| Dioxynaphthalene, Manufacture of Sulpho-Acids of. (P) Wilcox. From The Farbenfabriken vormals Bayer and Co. (x, 1891)                                                                                                                             | 760      | Compounds derived from Phenylendiamine. (Wallach and Schulze.) (ii, 1883)                                              | 268      |
| Monosulpho Acid. (P) Bang. From Basle Chemical Works, Bindschedler. (xiii, 1894)                                                                                                                                                                  | 632      | Discharge and Resist Styles with Aniline black. (Dreyfus.) (xiii, 1894)                                                | 485      |
| Monosulpho Acid, Production of. (P) Bang. From Dahl. (x, 1891)                                                                                                                                                                                    | 131      | For Dyes, Mordanted with Chromic Oxide. (Schmid.) (x, 1891)                                                            | 134      |
| Mono-sulphonates, Production of Azo-Colouring Matters from. (P) Imray. From The Farberwerke vormals Meister, Lucius and Bruning. (ix, 1890)                                                                                                       | 803      | Of Indigo Blue. (Scheurer.) (iv, 1885)                                                                                 | 493      |
| Sulpho Acids, Manufacture of. (P) Wilcox. From Farbenfabriken vormals Bayer and Co. (xi, 1892)                                                                                                                                                    | 999      | On Indigo, Producing White and Buff. (Geller.) (x, 1891)                                                               | 135      |
| Treatment of. (Weber.) (i, 1882)                                                                                                                                                                                                                  | 100      | Printing on Indigo Dyed Fabrics. (P) Imray. From Farberwerke vormals Meister, Lucius and Bruning. (xi, 1892)           | 160      |
| Dioxynaphtho-mono-sulpho Acid. (P) Imray. From Basle Chemical Works, Bindschedler. (xiii, 1894)                                                                                                                                                   | 632      | Discharges and Resists on Silk. (Koechlin.) (xiii, 1894)                                                               | 727      |
| Acid and its Salts, Production of. (P) Imray. From The Society of Chemical Industry in Basle. (xii, 1893)                                                                                                                                         | 597      | On Aniline Black. (Koechlin.) (xiii, 1894)                                                                             | 727      |
| Dioxyphenanthrene, Preparation of. (P) Reinherz. (iv, 1885)                                                                                                                                                                                       | 458      | On Aniline Black Grounds, Coloured. (Kay.) (xiii, 1894)                                                                | 1193     |
| Dioxytoluols. (Neville and Winther.) (ii, 1883)                                                                                                                                                                                                   | 167      | Weakening of Tissue in Printing white. (Scheurer.) (xi, 1892)                                                          | 33       |
| Dip for Sheep. (P) Robertson. (xi, 1892)                                                                                                                                                                                                          | 365      | Discharger for Diffusion-Sieve. (P) Skala and Raulich. (i, 1882)                                                       | 195      |
| For Sheep, Colouring. (P) Reade. (xi, 1892)                                                                                                                                                                                                       | 541      | Dischargers for Sugar Filtering Apparatus. (P) Lake. From Mathieson. (v, 1886)                                         | 330      |
| Pipes, Apparatus for Relieving Pressure in. (P) Landen. (ii, 1883)                                                                                                                                                                                | 264      | Discoveries and Inventions, Rewards for. (T.R.) (vii, 1888)                                                            | 782      |
| Diparatolymethaphenylendiamine. (Hatschek and Zega.) (v, 1886)                                                                                                                                                                                    | 161      | Discussion on Acid Tar Residues of Petroleum. (vii, 1888)                                                              | 376      |
| Diparatolylparaphenylendiamine. (Hatschek and Zega.) (v, 1886)                                                                                                                                                                                    | 161      | On an Apparatus for Colour Tests. (vi, 1887)                                                                           | 94       |
| Diparaxylyl Ketone. (Elbs and Olberg.) (v, 1886)                                                                                                                                                                                                  | 320      | On Broxburn Petroleum. (vi, 1887)                                                                                      | 352      |
| Dipentene. (Wallach.) (x, 1891)                                                                                                                                                                                                                   | 789, 851 | On Castner's Sodium Process. (vi, 1887)                                                                                | 247      |
| Diphenol, Conversion of Phenol into. (Dianin.) (ii, 1883)                                                                                                                                                                                         | 237      | On Coliery Waters. (vii, 1888)                                                                                         | 13       |
| Diphenol, <i>o</i> . (Limpricht.) (x, 1891)                                                                                                                                                                                                       | 691      | On Detection of Organic Bodies. (vi, 1887)                                                                             | 350      |
| Production of Mixed Azo-Colours from the Ethers of. (P) Martius. (vi, 1887)                                                                                                                                                                       | 139      | On Determination of Sulphur in Pyrites. (vi, 1887)                                                                     | 345      |
| Diphenoltrichloroethane and <i>p</i> -Dihydroxystilbene. (Elbs and Hoernemann.) (viii, 1889)                                                                                                                                                      | 876      | On Electrolytic Bleaching. (vi, 1887)                                                                                  | 246      |
| Diphenyl, Amidodiphenylsulphonic Acid and Azo-Dyes from. (Carnelley and Schlesman.) (v, 1886)                                                                                                                                                     | 376      | On English-grown Tobacco. (vi, 1887)                                                                                   | 162      |
| Diphenyl, Brominated Derivatives of. (Carnelley and Thomson.) (iv, 1885)                                                                                                                                                                          | 669      | On Estimating Iron. (vi, 1887)                                                                                         | 352      |
| Diphenyl Derivatives. (Tauber.) (ix, 1890)                                                                                                                                                                                                        | 600      | On Estimating Moisture in Superphosphates. (vi, 1887)                                                                  | 403      |
| Derivatives, Manufacture of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (x, 1891)                                                                                                                                                     | 759      | On Fixation of Nitrogen. (ix, 1890)                                                                                    | 271      |
| Occurrence of, in Coal-tar Oils. (Schulze.) (iii, 1884)                                                                                                                                                                                           | 409      | On Flash Point, &c. of Mineral Oil. (xii, 1893)                                                                        | 20, 21   |
| Diphenyl- $\alpha$ - $\gamma$ -diacpiperazine, Homologues of. (Nastvogel.) (viii, 1889)                                                                                                                                                           | 977      | On Micro Organisms. (vi, 1887)                                                                                         | 194      |
| Diphenylamine, Acid Sulphate of. (Vignon.) (vii, 1888)                                                                                                                                                                                            | 744      | On Paraffin Scale Testing. (vi, 1887)                                                                                  | 271, 351 |
| Application of, in Qualitative Analysis. (Laar.) (ii, 1883)                                                                                                                                                                                       | 45       | On Photochemical Estimation of Graded Tint. (vii, 1888)                                                                | 378      |
| As Reagent for Detecting Free Chlorine. (Hager.) (iv, 1885)                                                                                                                                                                                       | 613      | On Pyrometers. (vi, 1887)                                                                                              | 14       |
| As Reagent for Nitrates and Nitrites. (Hager.) (iv, 1885)                                                                                                                                                                                         | 613      | On Raising Acids. (vi, 1887)                                                                                           | 248      |
| Derivatives of. (Nietzki and Ernst.) (ix, 1890)                                                                                                                                                                                                   | 352      | On Starch, Archbold's reply to the. (vi, 1887)                                                                         | 189      |
| From Phenol, Formation of Aniline and. (Merz and Muller.) (vi, 1887)                                                                                                                                                                              | 138      | On Supply of Pure Alcohol. (vii, 1888)                                                                                 | 78       |
| Orthotolueno- and its Derivatives. (Schopff.) (ix, 1890)                                                                                                                                                                                          | 931      | On Tannin Estimation. (v, 1886)                                                                                        | 210      |
| Para-Nitroso. (Ikuta.) (vii, 1888)                                                                                                                                                                                                                | 318      | On Technical Education in Chemistry. (viii, 1889)                                                                      | 325      |
| Production of Sulpho-Acids of. (P) Abel. From Limmer. | Apparatus for Liquid Hydrocarbons. (P) Dvorkovitz and others. (xi, 1892).....                                                                       | 152      |
| Apparatus for Sea Water. (P) Smilie. (xi, 1892).....                                                                                                | 896      |
| Apparatus for Spirits:                                                                                                                              |          |
| (P) Morris and Wethered. (xiv, 1895).....                                                                                                           | 378      |
| (P) Thompson. (x, 1891).....                                                                                                                        | 783      |
| (P) Vignier. (xiv, 1895).....                                                                                                                       | 765      |
| Apparatus for Water. (P) Nagel. (xiii, 1894).....                                                                                                   | 623      |
| Apparatus, Fractional. (Otto.) (xiii, 1894).....                                                                                                    | 837      |
| App. in Ammonia Soda Works. (Passender.) (xii, 1893)...                                                                                             | 600      |
| Apparatus, Means for Regulating Liquor in. (P) Schwab. (x, 1891).....                                                                               | 626      |
| Apparatus, Portable. (P) Hood. (iv, 1885).....                                                                                                      | 133      |
| Apparatus, Vacuum. (P) Luck. (xi, 1892).....                                                                                                        | 148      |
| Conversion of Starch into Alcohol in Relation to. (Squire.) (iii, 1884).....                                                                        | 543      |
| Household Apparatus for. (P) John. (xi, 1892).....                                                                                                  | 465      |
| Industry in Germany. (T.R.) (ix, 1890).....                                                                                                         | 674      |
| Preparation of Grain or Cereals for Use in. (P) Forded. (vii, 1887).....                                                                            | 145      |
| Process of. (P) Wright. (v, 1886).....                                                                                                              | 331      |
| Refrigerator for Use in. (P) Worsam. (xiii, 1894).....                                                                                              | 269      |
| Distributor, Steam. (P) Henning. (i, 1882).....                                                                                                     | 349      |
| Water, for Gas Scrubber. (P) Berlin Anhaltische Maschinenbau-Actien Gesellschaft. (ii, 1883).....                                                   | 263      |
| Disulpho Acid, Manufacture of Alpha-Naphthol, and Colouring Matters from. (P) Lake. From Leonhardt and Co. (viii, 1889).....                        | 776      |
| Disulphones, Treatment of, for Medicinal Purposes. (P) Lunan. (ix, 1890).....                                                                       | 1063     |
| Disulphonethylenediamides, Production of Aromatic. (P) Marekwald and Holtz. (xii, 1893).....                                                        | 545      |
| Disulphonic Acids, Influence of Radicles, Cl, OH, and NH <sub>2</sub> , on Formation of. (Armstrong and Wynne.) (ix, 1890)....                      | 862      |
| Acids, Preparation of Quinoline. (P) La Coste. (iv, 1885)...                                                                                        | 464      |
| Disulphonipiperazides, Production of Aromatic. (P) Marekwald and Holtz. (xii, 1893).....                                                            | 545      |
| Di-terebene, A. (Renard and Berthelot.) (vii, 1888).....                                                                                            | 115      |
| Dithionic Acid, Double Salt of. (Bodlander.) (ix, 1890)....                                                                                         | 1127     |
| Acid, Preparation of. (de la Harpe.) (iv, 1885).....                                                                                                | 510      |
| Dithio-oxycarbon Acids, Production of Aromatic. (P) Baum. (ix, 1890).....                                                                           | 98       |
| Dithioisulphic Acid, Separation of the Isomeric Substances Produced in the Manufacture of. (P) Clark. From Von Heyden's Nachfolger. (ix, 1890)..... | 821      |
| Diethyl, Brominated Derivatives of. (Carnelley and Thomson.) (iv, 1885).....                                                                        | 669      |
| Diethylamine, Para-, Nitro- and Amido- Derivatives of. (Jauber.) (xiv, 1895).....                                                                   | 890      |
| Dittmar, Resolution of Condolence on death of Prof. (xi, 1892)...                                                                                   | 224      |
| Dividends, German Chemical. (T.R.) (xiv, 1895).....                                                                                                 | 403, 498 |
| Divider and Mixer for Ore Samples. (Bridgman.) (xi, 1892)...                                                                                        | 268      |
